+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed and validated data sets for actuarial analysis, achieving **99.8% data accuracy** through rigorous quality checks and reconciliations, directly supporting wider team requirements.
- Supported the development and testing of actuarial models, implementing **Python scripts** for automated assumption updates and reducing manual validation time by **40%**.
- Contributed to the maintenance of actuarial reports by performing routine analyses using established methods and tools, ensuring timely delivery to stakeholders.
- Integrated **AI and machine learning** concepts into model development by applying **scikit-learn** for predictive analytics on historical claim data, enhancing model forecasting accuracy by **15%**.
- Collaborated with senior actuaries and analysts on complex analytical tasks, adhering to defined processes and guidance to ensure consistent and reliable outcomes.
- Managed and enhanced **SQL database** structures for analytical datasets, performing schema changes and optimizations that improved query performance by **20%** for reporting.

SKILLS

Data Analysis & Actuarial – Actuarial Analysis, Data Validation, Reconciliations, Predictive Modeling, Statistical Analysis, Time-Series Analysis, Hypothesis Testing.

Programming & Scripting – Python, R, SQL, pandas, NumPy, scikit-learn.

Business Intelligence Tools – Power BI, DAX, Power Query, Tableau.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Enterprise Systems – Java Spring Boot, REST APIs, ERP Support, Change Management.

Observability & Monitoring – Splunk, Dynatrace.

Operating Systems – Linux, Shell Scripting.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Healthcare Claims Predictive Analytics Platform (MSc Project)

- Designed and implemented a predictive model using **Python** and **scikit-learn** to forecast healthcare claim costs based on historical data, achieving a **92% accuracy rate**.
- Developed ETL processes using **pandas** and **Power Query** to clean and transform diverse healthcare data sources, including diagnosis codes and procedure codes, creating a unified dataset for analysis.

- Built interactive dashboards in **Power BI** to visualize claim trends, model predictions, and key performance indicators for stakeholders, facilitating data-informed decision-making and improving understanding of cost drivers.

Financial Services Transaction Monitoring System (HCL Technologies)

- Enhanced a payments operations dashboard by developing **Java Spring Boot** microservices to monitor transaction flows and identify anomalies in near real-time, reducing manual oversight by **30%**.
- Automated critical data validation and reconciliation workflows using **Python scripting** and **SQL** queries against PostgreSQL and Oracle databases, improving data integrity for financial reporting.
- Managed production incidents and performed root cause analysis for a high-availability financial services dashboard, ensuring adherence to strict SLAs and maintaining audit trail integrity.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
