PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Java Spring Boot microservices** for a financial-services operations dashboard, handling over 1 million transactions daily and reducing processing latency by **15%**.
- Automated ETL processes and reporting tasks using **Python scripting**, decreasing manual data manipulation effort by **40%** and ensuring data accuracy for downstream analytics.
- Optimized complex **SQL queries** across PostgreSQL and Oracle databases for an ERP system, improving report generation times by an average of **30%** and supporting critical business operations.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 issues within strict SLA targets and maintaining **99.95%** system uptime.
- Contributed to a **payments operations dashboard** by implementing transaction monitoring and reconciliation workflows, enhancing operational visibility and reducing manual reconciliation effort by **25%**.
- Enhanced CI/CD pipelines with **Jenkins** and Git, integrating automated testing and code reviews, which reduced deployment cycle times by **20%**.

SKILLS

Programming Languages – Python, Java, SQL, R, DAX

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

BI & Data Visualization – Power BI, Tableau, Power Query

Enterprise Systems – ERP Integration Support, Change Management, REST APIs

Monitoring & Logging – Splunk, Dynatrace

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

AI-Powered Predictive Maintenance Platform

- Engineered a real-time anomaly detection system using **Python** and **scikit-learn** on sensor data streams, achieving **92%** accuracy in predicting equipment failures.
- Developed data pipelines with **pandas** and **SQL (PostgreSQL)** to ingest and preprocess terabytes of time-series data, reducing data preparation time by **50%**.

- Built interactive dashboards in **Power BI** to visualize predicted failures and maintenance schedules for over 10,000 industrial assets, enabling proactive intervention and saving an estimated **\$2M** annually in unplanned downtime.

Financial Transaction Monitoring Dashboard

- Implemented real-time transaction monitoring and alerting for a payments operations dashboard using **Java Spring Boot**, processing over 500,000 messages daily.
- Developed Python scripts to automate the reconciliation of transaction data between disparate systems, reducing manual reconciliation effort by **30%**.
- Ensured adherence to GDPR and audit trail requirements within the production environment, maintaining a high level of data integrity and compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
