PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Automated data ingestion and transformation processes for a financial-services operations dashboard, reducing manual ETL effort by **40%** through Python scripting and SQL.
- Enhanced production system reliability for enterprise applications by implementing proactive monitoring and incident response protocols using **Splunk** and **Dynatrace**, achieving 99.95% service uptime.
- Developed and deployed new features for a **Java Spring Boot**-based REST API, integrating with upstream services and improving data processing throughput by **15%**.
- Managed change control procedures for enterprise business systems, coordinating User Acceptance Testing (UAT) and ensuring successful post-go-live support for critical updates.
- Designed and implemented interactive business intelligence dashboards in **Power BI**, translating complex datasets into actionable insights for stakeholders, which informed strategic decisions leading to a **10%** cost reduction.
- Refactored SQL queries across **PostgreSQL** and **Oracle** databases for an ERP system, optimizing performance and reducing query execution times by an average of **28%**.

SKILLS

Data Engineering – Python, SQL, ETL, Data Warehousing, PostgreSQL, MySQL, Oracle, pandas, NumPy, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Business Intelligence – Power BI, Tableau, DAX, Power Query, Data Modelling, R/RStudio

Backend Development – Java, Spring Boot, REST APIs, Microservices

Production Support – Splunk, Dynatrace, Incident Management, SLA Management, Change Management

Enterprise Systems – ERP Integration, Business Systems Support, Jira, Confluence

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Optum Health Data Pipeline Orchestration Platform

- Engineered a scalable data pipeline using **Python** and **Apache Airflow** to ingest, clean, and transform terabytes of patient health records from disparate sources, enabling near real-time analytics.
- Developed robust data quality checks and validation rules within the pipeline, reducing data error rates by **95%** and ensuring compliance with healthcare data standards.

- Integrated the pipeline with downstream data warehousing solutions (e.g., Snowflake) and BI tools, providing critical data for clinical outcome analysis and operational efficiency improvements, contributing to a projected **\$5M** annual saving in operational overhead.
- Implemented comprehensive monitoring and alerting using **Prometheus** and **Grafana**, achieving 99.99% pipeline uptime and facilitating rapid issue resolution.

Financial Services Transaction Monitoring Dashboard

- Developed a **Java Spring Boot** application to process and monitor high-volume financial transaction messages, ensuring data integrity and identifying anomalies.
- Created automated alerts and reporting mechanisms using **Python** and SQL queries against **PostgreSQL**, flagging failed or delayed transactions within strict SLAs.
- Collaborated with business analysts to define reconciliation workflows and audit trail requirements, supporting regulatory compliance and operational transparency.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
