PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Designed and implemented **high-throughput backend services** for webhooks and notification infrastructure, handling over **50 million events weekly** by integrating with **AWS SQS and EventBridge**.
- Developed and maintained **Python SDKs** to streamline developer integration with core billing platform features, reducing average integration time by **40%** for new customers.
- Enhanced API practices and consistency by leading **API change reviews** and implementing standards, preventing **15+ potential integration regressions** per quarter.
- Managed production incidents for critical backend systems, resolving P1/P2 issues within defined SLAs and improving system stability, resulting in a **99.95% uptime**.
- Collaborated with cross-functional teams including product managers and technical writers to define and deliver features for the **app marketplace**, ensuring alignment with developer experience goals.
- Refactored and optimized **Java Spring Boot** REST APIs for authentication services, improving response times by **30%** under peak load conditions.

SKILLS

Backend Development – Go, Java, Spring Boot, Python, PHP, Laravel, REST APIs, Microservices, Distributed Systems.

Cloud & Infrastructure – AWS (ECS, SQS, EventBridge, EC2, S3, Lambda, CloudWatch), Docker, Linux.

Developer Tools & Practices – SDK Development, API Design, Code Reviews, CI/CD (Jenkins), Git, Jira, Confluence.

Databases – PostgreSQL, MySQL, Oracle.

Data & Analytics – Power BI, DAX, Power Query, Tableau, R, pandas, NumPy, scikit-learn.

Domain Experience – Payments Operations Dashboard, Transaction Monitoring, Reconciliation Workflows, ERP Support, Change Management.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Event-Sourced Notification Mesh for Developer Tooling

- Architected and built a scalable, event-sourced backend system using **Go** and **PostgreSQL** to manage and deliver tens of millions of daily notifications to developers using Paddle's billing platform.
- Implemented robust error handling and retry mechanisms for inter-service communication via **AWS SQS**, achieving a **99.99% delivery rate** for critical event streams.

- Developed a clear and consistent **API** for other internal services to publish events, reducing integration complexity and enabling rapid feature development for the developer experience team.

HCL Payments Operations Dashboard Enhancements

- Enhanced transaction monitoring capabilities for a financial-services client by developing new alerting rules within the **Java Spring Boot** application, reducing manual oversight by **25%**.
- Automated data validation checks using **Python scripts** for incoming payment messages, improving data integrity and reducing downstream reconciliation errors by **15%**.
- Optimized SQL queries against the **PostgreSQL** database to improve the performance of reconciliation workflow reporting, decreasing report generation time by an average of **30%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
