

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Python** data pipelines, reducing manual data aggregation time by **40%** for analytics initiatives.
- Supported **analytics** and data quality initiatives by performing complex **SQL** queries against relational databases, improving data accuracy by **15%**.
- Collaborated with cross-functional teams to deliver business-focused solutions, translating requirements into actionable data attributes and reports.
- Designed and implemented **data attributes** across multiple disparate data sources, ensuring consistency and enabling enhanced reporting capabilities.
- Applied **machine learning** fundamentals to analyse datasets, identifying key drivers for business outcomes and supporting predictive modelling efforts.
- Managed **data quality** initiatives, establishing validation rules and monitoring processes to uphold data integrity across critical business systems.

SKILLS

Programming Languages – Python, SQL, Java

Data Science & Analytics – Machine Learning, Data Modelling, Statistical Analysis, Data Warehousing, Business Intelligence

Data Manipulation & Reporting – Data Attributes Development, Data Quality Initiatives, Relational Databases, Power BI, Tableau

Backend & Cloud – Java Spring Boot, REST APIs, AWS, Docker, Linux

Development Tools & Methodologies – Git, Jenkins, Jira, Agile/Scrum

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Customer Churn Prediction and Prevention Platform

- Engineered a **Python**-based predictive model using **scikit-learn** to identify customers at high risk of churn, achieving **85% accuracy** in early detection.
- Developed **data pipelines** to ingest and process customer interaction data from multiple sources, including CRM and transaction logs, supporting the analytical requirements.
- Implemented **SQL** queries and transformations to prepare features for the machine learning model, ensuring data quality and consistency, which reduced data preparation time by **30%**.

- Collaborated with marketing and sales teams to integrate churn predictions into targeted retention campaigns, contributing to a **10% reduction** in customer attrition.

Financial Services Transaction Monitoring Dashboard

- Supported production operations for a financial-services dashboard, focusing on **transaction monitoring** and operational alerting for payment message flows.
- Automated data validation checks using **Python** scripting, improving the detection rate of anomalies in reconciliation workflows by **20%**.
- Managed change requests and performed post-implementation triage for system configuration updates, ensuring adherence to strict SLAs and audit trail requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
