PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Automated operational processes by developing **Python** scripts for data pipelines and scheduled reporting, reducing manual effort by **40%**.
- Designed and built **CI/CD pipelines** using Jenkins and Git, enabling faster and more reliable software delivery cycles for enterprise applications.
- Managed and monitored production environments for a financial-services client, ensuring **99.9% uptime** through proactive incident response and SLA management using **Splunk** and **Dynatrace**.
- Developed and maintained **REST APIs** for enterprise business systems integrations, supporting cross-system data flows between PostgreSQL and Oracle databases.
- Implemented Infrastructure as Code using **Terraform** to provision and manage **AWS** resources, including **EC2** and **S3**, achieving consistent and repeatable infrastructure deployments.
- Troubleshoot and resolved complex infrastructure and deployment issues across **Linux** environments, improving system stability and reducing critical incidents by **15%**.

SKILLS

Cloud Platform – AWS (EKS, EC2, S3, IAM, RDS, Lambda), Docker

Container Orchestration – Kubernetes

Infrastructure as Code – Terraform

CI/CD & Automation – Jenkins, GitHub Actions, GitLab CI/CD, Python, Bash

Databases & Data Management – PostgreSQL, MySQL, Oracle, Data Warehousing

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Development & Scripting – Java, Spring Boot, Python, REST APIs, SQL

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Multi-Region Kubernetes GitOps Platform with Blue-Green Deployment Automation

- Architected and implemented a **multi-region Kubernetes** platform across **AWS**, enabling scalable deployment of microservices.
- Developed custom **CI/CD pipelines** using **GitHub Actions** to automate the build, test, and deployment of containerized applications.

- Integrated **Terraform** for declarative infrastructure provisioning and management of **EKS** clusters, ensuring **99.95% availability**.
- Implemented a GitOps workflow using Argo CD for automated synchronization of cluster state with Git repositories, reducing deployment lead time by **50%**.
- Designed and executed **blue-green deployment** strategies to minimize downtime during application updates, achieving zero-downtime releases for critical services.

Financial Services Transaction Monitoring and Reconciliation Dashboard

- Developed production support solutions for a financial-services client's payments operations dashboard, focusing on **transaction monitoring** and operational alerting.
- Automated data validation and reconciliation workflows using **Python** scripts and **SQL** queries against PostgreSQL and Oracle databases, improving data accuracy by **98%**.
- Enhanced system observability by configuring **Splunk** and **Dynatrace** dashboards to provide real-time insights into payment message processing and identify bottlenecks, reducing incident detection time by **30%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
