PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Assisted with the return to service of **AOG aircraft** by coordinating technical defect analysis and resource allocation, reducing average recovery time by **15%**.
- Liaised with **Engineers and Flight Crew** regarding technical defects, providing clear communication channels to expedite issue resolution and maintain operational continuity.
- Managed the dispatch of the **Lear Jet** for timely transportation of engineers and critical spares to AOG aircraft locations, minimizing aircraft downtime by **20%**.
- Reviewed open **HILs and forecasting maintenance schedules** to ensure planned tasks were accomplished, contributing to a **98%** on-time completion rate for scheduled maintenance activities.
- Provided **fleet AOG status visibility** through timely updates and distribution of technical issue reports to senior management and relevant teams.
- Supported **maintenance control operations** by managing incoming technical defect reports and assisting in the planning and execution of aircraft return-to-service procedures, ensuring adherence to strict operational SLAs.

SKILLS

Aviation Maintenance – AOG Aircraft Recovery, Technical Defect Reporting, Maintenance Planning, Flight Crew Liaison, Aircraft Spares Logistics.

Operations Support – Fleet Status Monitoring, Incident Management, SLA Adherence, Shift Work Coordination, Operational Continuity.

Engineering Support – Technical Defect Analysis, Return to Service Procedures, Maintenance Control, Forecasting Maintenance.

Communication & Organization – Cross-functional Liaison, Stakeholder Reporting, Information Distribution, Calm Under Pressure, Multi-tasking.

Technical Skills – Linux Shell Scripting, Python Automation, SQL Data Validation, Java Spring Boot, AWS EC2.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Aircraft Maintenance Logistics & Recovery System (HCL Technologies)

- Developed a Python-based automation tool to streamline the tracking and dispatch of engineers and spares for AOG aircraft recovery, reducing dispatch lead times by **25%**.

- Integrated with existing maintenance logs and flight schedules using SQL queries against a PostgreSQL database to provide real-time AOG status updates to stakeholders.
- Created automated reports using Python and delivered them via email to management, detailing aircraft status, estimated recovery times, and resource allocation, improving fleet visibility by **40%**.

Real-time Payments Operations Dashboard Enhancements

- Enhanced a Java Spring Boot-based payments operations dashboard by implementing new monitoring dashboards in Splunk, improving visibility into transaction flow issues and reducing P1 incident resolution time by **18%**.
- Developed Python scripts to automate data validation checks for incoming financial transaction messages, identifying and flagging **99.5%** of malformed messages before processing.
- Refined SQL queries for transaction monitoring and reconciliation workflows, optimizing performance and reducing report generation times by **30%** across critical financial data sets.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
