PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Python backend services** using **Flask** and **FastAPI**, supporting a high-traffic consumer platform and reducing API latency by **18%**.
- Designed and managed **PostgreSQL database schemas** for core platform data, implementing indexing strategies that improved query performance by **30%**.
- Authored and optimized **SQL queries** for complex data retrieval and reporting, ensuring data integrity and reducing report generation times by an average of **22%**.
- Built and deployed **background processing jobs** and automated workflows using **Python**, handling over 100,000 system tasks daily and improving operational efficiency by **15%**.
- Collaborated with **marketing and operations stakeholders** to translate business needs into technical solutions, developing features that directly contributed to a **5% increase** in platform engagement.
- Investigated and resolved production issues across **AWS-hosted systems**, implementing monitoring with **CloudWatch** and reducing critical incident response times by **25%**.

SKILLS

Backend Development – Python, Flask, FastAPI, REST APIs, Microservices, Asynchronous Processing, Background Jobs.

Databases – PostgreSQL, SQL, Database Schema Design, Query Optimization, Data Warehousing.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git, Linux.

Data Processing & Analytics – Python (pandas, NumPy, scikit-learn), ETL, Data Pipelines, Reporting, AI-assisted Development Tools.

Methodologies – Agile, Scrum, Change Management, Incident Response, UAT Support.

Frontend Support – React, Angular, AI-assisted Development Tools.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Real-Time Consumer Platform Backend & Data Pipeline

- Engineered a **Python backend** using **FastAPI** and **PostgreSQL** to manage user profiles, transaction data, and platform activity for a large-scale consumer platform, processing over 500,000 requests daily.
- Developed asynchronous **background processing jobs** with **Celery** to handle data ingestion from multiple sources and generate daily operational reports, reducing manual intervention by **40%**.

- Implemented robust **API endpoints** for frontend consumption and integrated with third-party services, ensuring seamless data flow and supporting a **10% growth** in active users within six months.
- Utilized **AI-assisted development tools** to accelerate code generation for boilerplate API structures and test case creation, improving developer productivity by an estimated **20%**.

Financial Services Operations Dashboard Enhancements

- Enhanced a **payments operations dashboard** by developing new **Java Spring Boot** services to monitor transaction flows and provide real-time alerts for failed payments, improving operational visibility for financial client.
- Automated data validation and reconciliation checks using **Python scripts** against **Oracle and PostgreSQL databases**, reducing manual data verification effort by **30%** and ensuring data accuracy for audit trails.
- Supported production environments with strict SLAs, performing incident response and root cause analysis for P1/P2 incidents, maintaining **99.95% uptime** for critical financial operations.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
