PROJECTS

Reconciliation ETL Pipeline Optimization (HCL Technologies)

- Engineered a scalable **ETL solution** using **Python** and **SQL** on **AWS** to process high-volume financial transaction data for reconciliation, handling over 1 million records daily.
- Implemented robust data validation checks and automated discrepancy resolution workflows, reducing manual reconciliation efforts by **40%** and improving data accuracy.

- Developed comprehensive documentation for the **ETL processes**, data lineage, and business logic, facilitating knowledge transfer and ensuring compliance with financial services regulatory requirements.

Payments Operations Dashboard Enhancements (HCL Technologies)

- Enhanced a **payments operations dashboard** by developing new **Java Spring Boot** microservices for real-time transaction monitoring and alerting on failed payment messages.
- Optimized SQL queries against PostgreSQL databases, improving report generation performance by **20%** and supporting critical reconciliation workflows.
- Collaborated with business analysts to refine alerting mechanisms and operational dashboards, directly supporting SLA management for a key financial services client.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
