PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Maintained **IT and RF equipment** within Emergency Services vehicles and Control Centres, reducing critical system downtime by **18%** through proactive break/fix support and adherence to contract manuals.
- Delivered preventative maintenance across network infrastructure, achieving a **99.5% SLA compliance** for critical national network uptime by monitoring solutions to prevent outages.
- Completed site documentation and **RMA processes** for faulty equipment, improving parts return efficiency by **22%** and ensuring accurate audit trails for regulatory compliance.
- Provided out-of-hours **on-call support** for network services, resolving an average of **3 critical incidents** per shift within defined response times.
- Managed workflow and escalated third-party requirements for network hardware, ensuring timely resolution of **recurring faults** and minimising service disruption.
- Assisted with root cause analysis for network outages, implementing corrective actions that reduced repeat incident occurrences by **15%**.

SKILLS

Networking – IP, RF communications systems, routers, wireless/wired networks, network infrastructure

Hardware Maintenance – MDTs, TETRA systems, RF/IT connectors, Emergency Services vehicles equipment

Support & Operations – Preventative maintenance, break/fix support, on-call support, incident management, root cause analysis, RMA processes, site documentation

Compliance & Standards – Telnet QEHS/ISO standards, health and safety understanding, regulatory compliance

Technical Infrastructure – ICT Infrastructure, PCs, radio frequency equipment, control centres

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Emergency Services Vehicle Communications Network Upgrade (HCL Technologies)

- Designed and implemented a resilient **IP and RF communication system** for a fleet of 150 Emergency Services vehicles, integrating **MDTs and TETRA systems** to ensure continuous connectivity.
- Achieved a **99.9% service availability** for in-vehicle communication systems by performing rigorous preventative maintenance and rapid break/fix support, reducing vehicle downtime by **25%**.
- Developed detailed **site documentation** and standard operating procedures for field engineers, streamlining the maintenance process and improving response times for network faults by **20%**.

Critical Infrastructure Monitoring & Alerting Dashboard (HCL Technologies)

- Developed and maintained a **payments operations dashboard** using Java Spring Boot and PostgreSQL, providing real-time transaction monitoring for a financial-services client.
- Implemented automated alerting for failed payment messages, decreasing resolution time for critical issues by **30%** and ensuring adherence to strict SLAs.
- Collaborated with business analysts to refine operational alerting logic, supporting reconciliation workflows and enhancing overall system stability within a **GDPR-aware production environment**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
