PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Automated duplicate detection and spam filtering for bug bounty reports, reducing manual triage effort by **40%** through **Python** scripting and targeted alert enrichment.
- Developed AI-assisted investigation tooling using **LLM copilots** and **Slack bots**, correlating security alerts across **SIEM** and **EDR** data to surface critical incidents **30%** faster.
- Engineered response workflows that draft remediation steps and generate evidence artifacts, improving closure rates for critical vulnerabilities by **25%** and ensuring SLA adherence.
- Supported audit evidence collection for **SOC 2** and **ISO 27001** compliance by performing automated log analysis and generating detailed reports on system configurations and access controls.
- Tuned **SIEM** rules and enriched alerts with contextual data, decreasing false positive noise by **50%** and allowing responders to focus on actionable threats.
- Reproduced and documented complex technical vulnerabilities, collaborating with engineering teams to verify fixes and expedite remediation cycles in a production environment.

SKILLS

Security Operations – Bug Bounty Triage, Vulnerability Management, Threat Response, SIEM, EDR, DLP, Incident Investigation, Remediation Tracking, Compliance Auditing (SOC 2, ISO 27001, PCI DSS)

AI/ML Security Tooling – LLM Copilots, Prompt Engineering, Agent Frameworks, OpenAI, Anthropic, RAG Pipelines, Generative AI Security

Automation & Scripting – Python, Bash, CI/CD, Jenkins, Git, API Integrations

Cloud Security – AWS (EC2, S3, Lambda, CloudWatch), GCP, IAM, Workload Posture

Data Analysis & Visualization – SQL (PostgreSQL, MySQL, Oracle), Power BI, Tableau, Splunk, Dynatrace

Enterprise Systems & Support – Production Support, SLA Management, P1/P2 Incident Response, Change Management, ERP Integration Support, Technical Documentation

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

AI-Powered Security Triage and Response Platform

- Architected and built an integrated platform automating bug bounty triage, vulnerability reproduction, and remediation tracking using **Python**, **OpenAI LLM**, and **PostgreSQL**.
- Developed AI agents to pre-classify incoming vulnerability reports, identify duplicates with **95% accuracy**, and automatically route valid issues to the appropriate engineering teams via **Slack bots**.

- Implemented automated response workflows that generated remediation plans and evidence artifacts, reducing average incident closure time by **35%** and improving adherence to critical vulnerability SLAs.

Financial Services Transaction Monitoring Dashboard

- Supported a payments operations dashboard for a financial services client, focusing on transaction-flow monitoring and operational alerting for failed payment messages.
- Enhanced system stability by implementing proactive monitoring and incident response, contributing to a **99.9%** uptime for critical payment processing workflows.
- Collaborated with business analysts to refine operational dashboards and reporting, ensuring clear visibility into reconciliation workflows and transaction status.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
