

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Java Spring Boot** microservices, enhancing a financial-services dashboard by adding real-time transaction monitoring capabilities, resulting in a **15% reduction** in critical payment processing errors.
- Automated ETL processes using **Python** and **SQL** for a payments operations dashboard, reducing manual data ingestion time by **40%** and improving data accuracy for reconciliation workflows.
- Managed production incidents and SLA adherence for enterprise applications using **Splunk** and **Dynatrace**, resolving over **50 P1/P2 incidents** within target response times.
- Implemented feature enhancements and bug fixes in **Java Spring Boot** applications, contributing to a **10% increase** in system uptime for a core financial-services operations platform.
- Designed and implemented interactive dashboards and data visualizations in **Power BI** for MSc Data Analytics coursework, translating complex datasets into actionable insights for business stakeholders and achieving **95% stakeholder satisfaction**.
- Optimized **SQL** queries and database schemas across **PostgreSQL** and **MySQL** for ERP integration support, reducing data retrieval times by an average of **20%** for critical business reports.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Data Visualization – Power BI, Tableau, DAX, Power Query

Observability & Monitoring – Splunk, Dynatrace

Enterprise Systems – ERP Integration, REST APIs, Change Management

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Anomaly Detection System for Transaction Processing

- Engineered a scalable anomaly detection system using **Python** and **scikit-learn** to identify fraudulent transaction patterns in near real-time, achieving **92% precision** and reducing false positives by **30%**.
- Developed data pipelines with **pandas** and **SQL** to ingest and pre-process high-volume transaction data from multiple sources into a centralized data store (**PostgreSQL**), ensuring data integrity for model training.

- Deployed the anomaly detection service using **Docker** on **AWS EC2** instances, integrated with existing payment processing workflows via **REST APIs**, and monitored performance with **CloudWatch** to maintain **99.95% availability**.

Enhanced Payment Operations Dashboard

- Developed and maintained a financial-services operations dashboard using **Java Spring Boot** and **React**, providing real-time visibility into transaction flows and operational alerts for a major financial client.
- Implemented automated reconciliation workflows and transaction monitoring features, reducing manual reconciliation effort by **25%** and improving detection rates for payment discrepancies.
- Managed incident response and production support for the dashboard, adhering to strict SLAs and ensuring audit trail compliance for all critical operations within a GDPR-aware environment.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
