BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

AI-Augmented Infrastructure Development Platform (HCL Technologies)

- Engineered a cloud-native platform integrating **GitHub Copilot** and custom **AI agents** to automate code generation, unit test creation, and documentation for public infrastructure software.
- Streamlined the CI/CD process by embedding AI automation tools, reducing manual deployment steps by **40%** and enabling faster feature delivery cycles for cloud SaaS applications.

- Collaborated with Product Managers and Senior Engineers in discovery sessions to rapidly prototype and validate new AI-driven development methodologies, enhancing team productivity by **25%**.

Payments Operations Dashboard Enhancement (HCL Technologies)

- Enhanced a **payments operations dashboard** by implementing real-time transaction monitoring and operational alerting for failed payment messages, improving issue detection by **35%**.
- Developed Python scripts for data pipeline automation and scheduled reporting, supporting reconciliation workflows and contributing to audit trail generation within a GDPR-aware production environment.
- Managed change-control processes for system configuration updates and coordinated User Acceptance Testing (UAT) for critical updates to enterprise business systems.
