+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Java Spring Boot microservices** for a financial-services operations dashboard, processing 10,000+ transactions daily and reducing latency by **15%**.
- Automated data ingestion and validation processes using **Python scripts**, reducing manual data handling time by **40%** and improving data accuracy for regulatory reporting.
- Managed and optimized **PostgreSQL and Oracle databases**, executing schema changes and writing complex SQL queries to support ERP system integrations, ensuring data integrity across 3 enterprise systems.
- Enhanced production system reliability by implementing proactive monitoring and alerting using **Splunk and Dynatrace**, resolving P1 incidents within **30 minutes** and exceeding SLA targets.
- Contributed to the design and implementation of energy efficiency measures for industrial clients by analysing operational data, leading to a projected **12% reduction** in energy consumption.
- Integrated **AWS Lambda functions** with S3 event triggers for automated data processing, improving the efficiency of data pipeline workflows by **20%**.

SKILLS

Backend Development – Java, Spring Boot, Python, Flask, FastAPI, REST APIs, Microservices

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio, pandas, NumPy, scikit-learn, Data Warehousing, Statistical Analysis

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, CI/CD

Database Management – SQL, PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Project Management & Support – Agile/Scrum, Jira, Confluence, Production Support, Incident Response, Change Management, UAT Coordination

Energy Sector Specific – Energy Efficiency Measures, Energy Performance Contracting, Regulatory Innovation, Green Hydrogen Concepts

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Smart Grid Data Analytics Platform (Tyndall National Institute)

- Engineered a **Python-based data pipeline** to ingest and process smart meter readings from simulated residential and industrial sectors, handling up to **500,000 data points** per hour.

- Developed interactive **Power BI dashboards** to visualize energy consumption patterns, identify peak load times, and forecast demand, enabling stakeholders to understand energy usage trends and implement efficiency strategies with a projected **10% improvement** in energy management.
- Implemented statistical analysis using **R** to model the impact of regulatory changes on energy consumption, providing quantitative insights for policy recommendations to the SESRI team.

Financial Transactions Monitoring Dashboard (HCL Technologies)

- Built and maintained a **Java Spring Boot application** providing real-time transaction monitoring and alerting for a financial services client, achieving **99.95% uptime**.
- Automated reconciliation workflows using **SQL scripts** across PostgreSQL and Oracle databases, reducing processing time for batch reconciliation jobs by **25%**.
- Developed REST APIs for seamless integration with downstream operational systems, facilitating efficient data exchange and supporting a **15% increase** in transaction processing throughput.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
