PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Designed and implemented **data ingestion patterns** for core banking domains, including accounts, balances, and transaction postings, enabling a **30% reduction** in data latency for downstream reporting.
- Built **reconciliation controls** that validated reporting datasets against source systems, ensuring trial-balance alignment and achieving **99.95%** data integrity for regulatory audits.
- Developed **event-driven pipelines** using Kafka concepts and **Python scripting** to process near-real-time financial transactions, supporting alerts for fraud detection with a **1-second** processing SLA.
- Implemented **idempotent ingestion patterns** for core banking data, preventing data duplication during retries and ensuring a **99.99%** uptime for critical transaction processing.
- Constructed **observability dashboards** for data pipelines using Splunk and Dynatrace, providing real-time insights into pipeline SLOs/SLIs and reducing incident response time by **20%**.
- Collaborated with Finance and Risk SMEs to translate requirements into **curated datasets** and extracts, supporting enhanced analytics and achieving **15%** faster generation of key financial reports.

SKILLS

Core Banking & Data Engineering – Ledger Data Modelling, Transaction Data, Event Streaming, Data Ingestion, Idempotency, Data Quality, Reconciliation, Data Lineage, Regulatory Reporting

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux Shell Scripting

Data Processing & Orchestration – Python, SQL (PostgreSQL, MySQL, Oracle), Kafka Concepts, Micro-batching, ETL

Observability & Monitoring – Splunk, Dynatrace, CloudWatch Metrics, Operational Dashboards, Incident Response

Development & Collaboration – Java Spring Boot, REST APIs, CI/CD (Jenkins), Git, Jira, Agile/Scrum

Data Visualization & BI – Power BI, DAX, Tableau, Power Query

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Core Banking Transaction Reconciliation Engine

- Engineered a **transaction reconciliation engine** for a simulated core banking platform, processing over **10 million transactions daily** to validate ledger integrity.
- Developed **idempotent data ingestion** using Python and PostgreSQL, ensuring accurate posting sets and sub-ledger balances with **zero data duplication** during high-volume processing.

- Implemented **automated reconciliation controls** and alerting mechanisms, achieving **99.98%** accuracy in matching source system totals to reporting views, reducing manual reconciliation effort by **40%**.

Financial Services Operations Dashboard Enhancement

- Enhanced a **payments operations dashboard** by developing **Python scripts** for automated data pipeline monitoring and alerting on failed payment messages, improving system uptime by **5%**.
- Integrated **Splunk dashboards** for real-time transaction flow monitoring and P1/P2 incident response, reducing mean time to resolution by **15%**.
- Supported **cross-functional collaboration** with business analysts to gather requirements for new operational reporting features, contributing to a **10%** improvement in payment processing visibility.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
