PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Designed and deployed resilient, scalable infrastructure on **AWS**, managing EC2 instances and S3 storage to support critical enterprise applications, achieving **99.95%** uptime.
- Streamlined **CI/CD pipelines** using **Jenkins** and **Git**, reducing deployment cycles by **40%** and enabling faster delivery of new features for the payments operations dashboard.
- Built and maintained containerized applications with **Docker**, orchestrating deployments to **AWS EC2** and improving application portability and consistency across development and production environments.
- Automated infrastructure provisioning and management tasks using **Python** scripting and **Linux shell scripts**, saving an estimated **15 hours** of manual effort per week.
- Implemented comprehensive monitoring and logging solutions with **Splunk** and **CloudWatch**, enabling proactive incident detection and reducing average resolution time for P1/P2 incidents by **25%**.
- Managed change-control processes for enterprise business systems, coordinating User Acceptance Testing (UAT) and supporting post-go-live operations for integrated platforms, ensuring seamless system updates.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Digital Ocean

Containerization & Orchestration – Docker, Kubernetes

CI/CD & Automation – Jenkins, Terraform, Ansible, Python, Linux Shell Scripting

Monitoring & Logging – Prometheus, Grafana, Splunk, CloudWatch

Infrastructure as Code – Terraform, Ansible

System Administration – Linux, Networking Concepts

Security & Access Management – IAM Principles, Secrets Management

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Multi-Region Kubernetes GitOps Platform with Blue-Green Deployment Automation

- Architected and implemented a **GitOps-driven Kubernetes** platform across **AWS and Digital Ocean**, enabling automated, declarative infrastructure management.
- Developed **CI/CD pipelines** using **Argo CD** and **Jenkins** to automate the deployment of microservices, integrating **Docker** containerization and ensuring zero-downtime **blue-green deployments**.

- Integrated **Prometheus and Grafana** for real-time monitoring of cluster health and application performance, achieving **99.99%** availability and reducing critical alerts by **60%** through proactive issue resolution.

Financial Services Transaction Monitoring Dashboard Enhancement

- Enhanced a **payments operations dashboard** by developing automated **Python ETL** scripts to process and validate inbound transaction messages, improving data accuracy by **15%**.
- Implemented real-time alerting mechanisms using **Splunk** for failed or stalled payment messages, reducing the manual triage effort for operations teams by **30%**.
- Collaborated with business analysts to refine reconciliation workflows and audit trail generation, ensuring adherence to **GDPR** awareness and strict service-level agreements (SLAs).

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
