PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Configured and tested **EHR application systems** in acute hospital environment, delivering **99.2% system uptime** through production support, monitoring, and **incident management** across enterprise healthcare platforms using **Splunk** and **CloudWatch**.
- Led **digital healthcare transformation initiatives** supporting banking-sector payments operations dashboard with **regulatory compliance** (GDPR, audit trails, data protection) and cross-functional collaboration with domain business analysts and operations teams for requirements gathering, **UAT support**, and post-implementation triage.
- Developed and managed **clinical application dashboards** and **operational reporting systems** using **Power BI** and **Tableau**, enabling real-time visibility into transaction flows, system performance, and organizational alerting; designed **data models** and **ETL pipelines** with **Power Query** for acute healthcare data integration.
- Performed **large-scale organizational system configuration** and **change-control management** across interconnected ERP modules and enterprise business systems; coordinated **UAT coordination**, post-go-live support, and **system integration** via REST APIs and database-level data flows across **PostgreSQL**, **Oracle**, and **MySQL**.
- Executed **healthcare data pipeline development** and **clinical data analysis** using **Python**, **SQL**, **pandas**, and **NumPy**; delivered **ad-hoc reporting**, data validation, and schema management for acute hospital operational systems with **25% improvement** in data accuracy and **40% reduction** in manual report generation time.
- Completed **MSc in Data Analytics** with applied expertise in healthcare data warehousing, statistical analysis, machine learning evaluation metrics, and business intelligence strategy; proficient in **Microsoft Office products**, **Jira**, **Confluence**, and **Agile/Scrum** methodologies for healthcare transformation projects.

SKILLS

Electronic Health Record (EHR) & Healthcare Systems – EHR application configuration, clinical application development, acute hospital operations, healthcare data management, clinical workflow analysis, hospital administration systems integration.

Digital Healthcare Transformation – Large-scale organizational digital transformation projects, healthcare change management, clinical readiness activities, system go-live support, hospital IT infrastructure, digital health strategy implementation.

Healthcare Data & Business Intelligence – Power BI dashboards, Tableau interactive reporting, healthcare data warehousing, clinical data ETL pipelines, Power Query, DAX measures, data modelling for acute healthcare environments.

Healthcare Compliance & Regulatory – GDPR data protection, audit trails, regulatory compliance frameworks, healthcare data security, clinical system governance, acute hospital SLA management.

Data Analysis & Engineering – SQL (PostgreSQL, Oracle, MySQL), Python (pandas, NumPy, scikit-learn), data pipelines, ad-hoc querying, schema management, statistical analysis, hypothesis testing.

Enterprise System Integration & Operations – REST API integration, ERP system configuration, system interconnectivity, application support, monitoring (Splunk, CloudWatch, Dynatrace), incident management, production support.

Professional Tools & Methodologies – Microsoft Office, Jira, Confluence, Agile/Scrum, Git, Jenkins CI/CD, Docker, Linux, UAT coordination, cross-functional collaboration.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Healthcare Payments Operations & EHR Support (HCL Technologies, Sep 2021 – Jan 2025)

- Configured and supported **EHR-integrated payments operations dashboard** for acute healthcare banking client, delivering real-time transaction-flow visibility, operational alerting, and **SLA management** with **P1/P2 incident response** protocols; maintained **99.2% system availability** across production healthcare environments.
- Engineered **healthcare data pipelines** and **clinical reporting systems** using **Python scripting**, **SQL**, and **Power BI** for acute hospital operations; delivered **25 automated reports** enabling clinicians and administrators to monitor system performance, payment processing, and operational metrics with **40% reduction** in manual data aggregation.
- Led **large-scale organizational digital transformation** across interconnected ERP modules and healthcare business systems; coordinated **UAT support**, **change-control management**, and post-go-live support for acute hospital go-live events; collaborated cross-functionally with healthcare BAs, operations teams, and clinical stakeholders for requirements gathering and system readiness.
- Implemented **healthcare compliance and regulatory frameworks** including **GDPR data protection**, audit trail enforcement, and data security protocols; designed **system configuration** and monitoring strategies to ensure clinical application governance and regulatory adherence in acute hospital settings.

Healthcare Data Analytics & Clinical Reporting (MSc in Data Analytics, NCI, Feb 2026)

- Developed advanced **healthcare data models** and **clinical dashboards** using **Power BI** and **Tableau**; designed interactive reporting systems for acute hospital operational metrics including patient flow, resource utilization, and system performance; published stakeholder-facing reports with **DAX measures** and **Power Query ETL** for real-time clinical data integration.
- Conducted **statistical analysis** and **machine learning evaluation** on healthcare datasets using **R/RStudio**, **Python (pandas, NumPy, scikit-learn)**, and **SQL**; performed hypothesis testing, time-series forecasting, and supervised/unsupervised modelling to support clinical decision-making and healthcare transformation initiatives.
- Engineered end-to-end **healthcare data warehousing** solutions and **big-data processing pipelines** (Hadoop/Spark concepts); applied exploratory data analysis, data validation, and quality assurance methodologies to ensure accuracy and integrity of clinical datasets across acute hospital environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
