PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Deployed and operated **Kubernetes workloads on AKS** and self-managed clusters, managing **pods, deployments, services, RBAC, and namespaces** across multi-tenant production environments; wrote **Bash and Python automation scripts** to reduce manual operational toil by **40%**.
- Designed and extended **Terraform modules** for cloud infrastructure provisioning on **Azure** (VNets, subnets, peering, VPNs) and **AWS** (EC2, S3, Lambda), implementing **Infrastructure as Code** principles across **10+ service deployments** with **GitOps delivery using ArgoCD, Helm, and Kustomize**.
- Implemented **network policies, RBAC controls, identity and access management (OIDC/SAML)**, and **L2–L7 networking fundamentals** (TCP/IP, DNS, VPC peering) to enforce security posture across shared platform services; reduced unauthorized access incidents by **100%** through automated identity controls.
- Authored and maintained **CI/CD pipelines in GitLab and GitHub Actions**, driving **GitOps-first deployment patterns** with **version control** discipline; established runbooks and clear documentation to embed platform knowledge across **12+ engineering teams**, reducing mean time to resolution (MTTR) by **35%**.
- Contributed to the design and operation of an **Internal Developer Platform (IDP)** and service catalog, building self-service tooling and pre-designed controls that enabled application teams to deploy independently; mentored junior engineers on **Kubernetes, Terraform, and cloud networking** best practices.
- Managed **observability and alerting on Grafana Cloud**, instrumenting **multi-tenant Kubernetes platforms** with metrics, logs, and traces; participated in **on-call rotation** for shared platform services, resolving **P1/P2 incidents** with **99.5% SLA compliance**.

SKILLS

Cloud & Infrastructure – Azure (AKS, VNets, subnets, peering, VPNs), AWS (EC2, S3, Lambda, CloudWatch), GCP, Infrastructure as Code, IaC-first mindset.

Kubernetes & Containerization – Azure Kubernetes Service (AKS), EKS, GKE, self-managed Kubernetes, pods, deployments, services, RBAC, namespaces, Helm, Kustomize.

Infrastructure as Code & Automation – Terraform (module composition, configuration management), Bash scripting, Python automation, Git (version control, branching, collaboration).

CI/CD & GitOps – GitLab pipelines, GitHub Actions, ArgoCD, GitOps delivery patterns, Helm charts, continuous integration, continuous deployment.

Networking & Security – TCP/IP, DNS, VPCs, VNets, network policies, RBAC, identity and access control (OIDC, SAML), L2–L7 networking fundamentals, network security.

Observability & Operations – Grafana Cloud, metrics, logs, traces, alerting, on-call incident management, runbook documentation, SLA management.

Programming & Data Engineering – Python, Bash, REST APIs, data pipelines, ETL, SQL (PostgreSQL, MySQL, Oracle), pandas, NumPy.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Multi-Tenant Kubernetes Platform on Azure Kubernetes Service (HCL Technologies)

- Deployed and maintained production **AKS clusters** supporting **10+ interconnected microservices** in a banking environment; implemented **network policies, RBAC, and OIDC identity controls** to enforce least-privilege access across all namespaces.
- Extended **Terraform modules** for infrastructure provisioning (VNETs, subnets, peering, security groups); contributed to **GitOps-first delivery pipelines using ArgoCD, Helm, and Kustomize**, reducing manual deployments by **60%**.
- Built **Bash and Python automation scripts** to eliminate toil in resource monitoring, scaling, and remediation; integrated with **Grafana Cloud for observability** (metrics, logs, traces), achieving **99.5% platform availability**.
- Authored comprehensive runbooks and platform documentation (runbooks, architecture guides, troubleshooting playbooks) to embed knowledge across **8-person Platform Engineering team**; reduced onboarding time for junior engineers by **50%**.

Internal Developer Platform (IDP) & Service Catalog (HCL Technologies)

- Contributed to the design and implementation of an **Internal Developer Platform** providing self-service tooling, service catalog, and pre-designed controls for **15+ application engineering teams**.
- Built self-service infrastructure templates and **Terraform modules** for common workload patterns (stateless services, databases, message queues); application teams deployed independently, reducing time-to-production by **45%**.
- Implemented platform controls for **network policies, identity and access management (OIDC/SAML), and L2–L7 security guardrails** across the shared platform; wrote validation and testing scripts in **Python and Bash** to ensure compliance.
- Participated in **on-call rotation** managing platform reliability and incident response; owned **GitOps-first CI/CD delivery (GitLab, GitHub Actions, ArgoCD)**, ensuring **SLA compliance** and rapid incident resolution across all shared services.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
