PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Partnered with banking and investment operations stakeholders to gather, analyse, and document complex business requirements for SWIFT messaging and payments-processing systems; translated strategic objectives into detailed **business requirement documents, process flows, and use cases** that drove **3 major platform releases** supporting **€2.5B+ in daily transaction volume**.
- Converted complex financial services requirements into **user stories** with clear business value and acceptance criteria; led **story refinement sessions** across distributed Agile teams, applying **Acceptance Test-Driven Development (ATDD)** principles to achieve **98% first-pass acceptance rate** and **zero post-go-live defects**.
- Managed product backlogs and sprint planning using **JIRA** and **Confluence**; coordinated quarterly planning cycles with Product Managers and cross-functional stakeholders; prioritised and scheduled **40+ user stories** per quarter, maintaining **95% on-time delivery** across 2-week sprints.
- Led end-to-end test activities including **SQL** data validation, **REST API testing** with Insomnia, and functional verification across interconnected payment systems; defined and executed **story acceptance tests** in collaboration with QA and development teams, validating compliance with **ISO 20022 message flows, SEPA regulations, and GDPR data protection** requirements.
- Identified and managed **risks and dependencies** across enterprise technology initiatives; conducted impact analysis on **ERP integrations** and system architecture changes; documented **change-control workflows** and mitigation strategies, reducing deployment incidents by **40%**.
- Proactively identified **process and system improvements** through root-cause analysis of operational issues; designed and socialised **19 process enhancements** that improved transaction processing speed by **22%** and stakeholder sign-off time by **30%**.

SKILLS

Business Analysis & Requirements – business requirement documents, process flows, use cases, user story creation, acceptance criteria definition, Acceptance Test-Driven Development (ATDD), requirements gathering, stakeholder analysis.

Financial Services & Investment Domain – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA payments, cross-border payments, payments processing, investment operations, wealth management workflows, GDPR compliance, regulatory frameworks, audit trails.

Systems Analysis & Data Interpretation – data model analysis, SQL querying and data validation, REST API testing, application architecture understanding, code analysis for support purposes, interconnected system integration, ERP systems.

Tools & Platforms – JIRA, Confluence, SQL (PostgreSQL, MySQL, Oracle), Insomnia, Kafka Offset Explorer, Datadog, CloudWatch, Splunk, Dynatrace, Power BI, Tableau.

Agile & Delivery – Scrum ceremonies, sprint planning, backlog management, quarterly planning, distributed team collaboration, story refinement, risk and dependency management, change-control management.

Technical Skills – Python, Java, REST APIs, AWS (EC2, S3, Lambda), Docker, Linux, Git, Jenkins, CI/CD pipelines.

Modern Tools & Innovation – AI tools for systems analysis, Claude API integration, prompt engineering, AI workflow automation, GitHub Actions, process automation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

SWIFT Payments Operations Dashboard & Systems Analysis (HCL Technologies)

- Served as primary Systems Analyst for a mission-critical SWIFT messaging and payments-operations platform supporting a global banking client; partnered with business stakeholders, Product Manager, and cross-functional technology teams to understand strategic objectives and translate them into **user stories**, **acceptance criteria**, and **release roadmaps**.
- Analysed complex **ISO 20022 message flows**, **SEPA payment workflows**, and **GDPR compliance** requirements; created detailed **process flows** and **use cases** documenting transaction-flow visibility, operational alerting logic, and regulatory audit-trail requirements across **€2.5B+ daily transaction volume**.
- Led **story refinement sessions** applying **ATDD principles**; defined **acceptance tests** using **SQL** data validation and **REST API testing** with Insomnia to verify message formats, payment reconciliation, and compliance controls; achieved **98% acceptance-criteria pass rate** on first submission.
- Identified and managed **risks and dependencies** across payment-system integrations and **ERP interconnections**; coordinated **change-control management** for system configuration updates and UAT coordination; reduced post-go-live incidents by **40%** through proactive impact analysis.

Enterprise Business Systems Integration & Product Backlog Optimisation (HCL Technologies)

- Managed product backlogs and quarterly planning for cross-system integration initiatives; used **JIRA** and **Confluence** to document **business requirement documents**, maintain sprint schedules, and coordinate **Scrum ceremonies** across distributed teams in multiple locations; processed **40+ user stories** per quarter with **95% on-time delivery**.
- Conducted **data model analysis** and **SQL querying** across **PostgreSQL**, **MySQL**, and **Oracle** databases to validate data integrity and support system integration testing; identified **19 process improvements** through root-cause analysis, reducing transaction-processing latency by **22%** and stakeholder sign-off cycles by **30%**.
- Partnered with banking-domain business analysts and operations teams for UAT support and post-implementation triage; defined user acceptance test strategies, monitored **Datadog** and **CloudWatch** metrics during releases, and documented acceptance test results in **Confluence** for audit and compliance purposes.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
