PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **production-grade AI/LLM systems** using **Claude API (Anthropic)** and **prompt engineering** to automate JD-tailored resume generation at scale, orchestrating end-to-end workflows from data ingestion through **PDF generation** with **25% reduction in manual content-creation time**.
- Built and maintained **high-performance backend systems and APIs** using **Python, Flask, FastAPI**, and **REST APIs**, supporting enterprise Java/.NET applications with **99.5% uptime SLA** through proactive monitoring and incident response.
- Architected and optimized **data pipelines** and **ETL workflows** using **Python, pandas, NumPy**, and **SQL** across **PostgreSQL, MySQL, Oracle**, processing **10M+ transaction records monthly** for payments processing and financial data reconciliation.
- Deployed, managed, and scaled **cloud infrastructure** within **AWS (EC2, S3, Lambda, CloudWatch)** and **Docker** containerization, implementing **CI/CD pipelines** via **Jenkins** and **Git** to deliver **12+ production releases annually** with zero rollback incidents.
- Monitored, evaluated, and continuously improved **system performance in production** using **Splunk, Dynatrace**, and **CloudWatch**, identifying performance bottlenecks and reducing incident resolution time by **40%** through data-driven optimization.
- Collaborated across cross-functional teams to integrate **AI/LLM solutions seamlessly into existing platforms**, working with product and engineering stakeholders to define requirements, conduct UAT, and deliver **3 AI-powered features to production** supporting core business workflows.

SKILLS

AI & Machine Learning – LLMs, Claude API, Anthropic SDK, prompt engineering, model evaluation, production AI systems, supervised learning, unsupervised learning.

Backend Engineering & APIs – Python, Flask, FastAPI, REST APIs, Java Spring Boot, system design, API architecture, distributed systems.

Data Engineering & Pipelines – ETL workflows, data pipeline architecture, pandas, NumPy, scikit-learn, SQL, data warehousing, data modelling.

Cloud Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD (Jenkins, Git), deployment automation, system scaling.

Databases & Data Systems – PostgreSQL, MySQL, Oracle, schema design, query optimization, ad-hoc analysis, data validation.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, production monitoring, alerting, performance optimization, SLA management.

Tools & Platforms – GitHub Actions, Vercel, Power BI, Tableau, R, RStudio, Linux, Jira, Confluence, Apify.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

AI-Powered Resume Generation System – Ireland Jobs Tracker (Personal Project)

- Designed and built an end-to-end **production-grade AI system** integrating **Claude API (Anthropic)** with **structured-JSON prompt engineering** and constraint guardrails to generate job-description-tailored resumes at scale.
- Orchestrated **AI workflow automation** spanning data ingestion via **Apify scrapers**, JD processing, **LLM-powered content generation**, **reportlab PDF generation**, and deployment via **GitHub Actions CI** and **Vercel**, reducing manual resume creation time by 75%.
- Implemented **prompt engineering best practices** including multi-step reasoning, output validation, and fallback logic to ensure consistent, production-ready resume quality across **100+ JD variants**.

SWIFT Payments Operations Dashboard & System Monitoring (HCL Technologies)

- Designed and deployed a **production-grade monitoring and analytics system** for SWIFT messaging and payments-operations workflows supporting a tier-1 banking client, providing real-time transaction-flow visibility and operational alerting across **5M+ payment messages monthly**.
- Built **data pipelines** using **Python**, **SQL**, and **cloud infrastructure (AWS Lambda, CloudWatch)** to ingest, transform, and visualize **ISO 20022 message flows**, **SEPA/instant payments data**, and cross-border payment reconciliation with **sub-second latency**.
- Implemented **production monitoring and performance optimization** using **Splunk dashboards** and **Dynatrace**, reducing payment-processing incident detection time from **15 minutes to 2 minutes** and achieving **99.7% uptime SLA** across payment-operations systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
