PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, developed, and deployed **Python** applications on **AWS Lambda** and **API Gateway**, processing enterprise transactions at scale with **DynamoDB** for NoSQL persistence; achieved **99.9% uptime** across serverless microservices supporting **3.5M+ monthly requests**.
- Built and maintained **Infrastructure-as-Code** pipelines using **Terraform** and **CloudFormation** to provision and manage serverless environments across development, staging, and production; reduced infrastructure provisioning time by **70%**.
- Engineered reliable, scalable, and secure software applications using **object-oriented design principles** and **clean code practices**; implemented **code review** processes and participated in **pair programming** sessions to drive continuous quality improvement across the engineering team.
- Developed **Python** REST APIs and backend services integrating **Lambda**, **API Gateway**, and **DynamoDB**; collaborated with product managers, designers, and architects to implement solutions meeting business requirements; reduced API response latency by **45%**.
- Investigated, troubleshooted, and resolved software defects and performance issues in production serverless environments using **CloudWatch**, **Dynatrace**, and **X-Ray**; maintained **SLA compliance** and managed **P1/P2 incident response** cycles averaging **12-minute MTTR**.
- Contributed to system design and technical decision-making in cloud-based, serverless architecture; optimized **DynamoDB** throughput and **S3** storage costs by **35%**; assisted in continuous improvement of development processes and CI/CD delivery pipelines using **Jenkins** and **Git**.

SKILLS

Programming & Development – Python, JavaScript, TypeScript, Java Spring Boot, REST APIs, object-oriented design, clean code principles.

AWS Services & Cloud Infrastructure – Lambda, API Gateway, DynamoDB, S3, CloudWatch, EC2, Infrastructure-as-Code, Terraform, CloudFormation.

Databases & Data Engineering – DynamoDB, NoSQL, PostgreSQL, MySQL, Oracle, SQL, data pipelines, ETL, data warehousing.

DevOps, CI/CD & Monitoring – Jenkins, Git, Docker, CloudWatch, Dynatrace, X-Ray, code review, pair programming, Agile/Scrum.

Frontend & Modern Frameworks – React, Angular, TypeScript, responsive design.

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling, statistical analysis, pandas, NumPy, scikit-learn.

Domain & Compliance – Banking & Financial Services, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, payments processing, regulatory compliance, GDPR, data protection.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Serverless Transaction Processing Platform (HCL Technologies)

- Designed and deployed a **Python**-based serverless transaction processing system using **Lambda**, **API Gateway**, and **DynamoDB** to handle enterprise payment workflows; architecture supported **10,000+ TPS** with automatic scaling.
- Implemented **Infrastructure-as-Code** using **Terraform** and **CloudFormation** for repeatable deployment of serverless components across AWS environments; enabled rapid environment provisioning and disaster recovery workflows.
- Engineered **Python** microservices following **object-oriented design principles** and **clean code practices**; integrated with **DynamoDB** for transactional data persistence and **S3** for audit-trail archival, ensuring regulatory compliance and data integrity.
- Collaborated with product and architecture teams to define system design and technical requirements; conducted comprehensive **code reviews** and mentored junior engineers on serverless best practices and **Python** optimization techniques.

Ireland Jobs Tracker – AI-Powered Resume Automation (Personal Project)

- Built end-to-end AI workflow orchestration platform leveraging **Claude API (Anthropic)**, structured **Python** prompt engineering, and API integration to generate dynamically tailored resumes at scale; processed **500+ job descriptions** with **95%+ relevance accuracy**.
- Architected scalable data pipeline: **Apify** web scrapers → job description ingestion → **Claude-haiku-4-5** API calls with constraint guardrails → **reportlab** PDF generation; deployed on **Vercel** with **GitHub Actions** CI/CD automation.
- Developed robust **Python** backend integrating third-party APIs and managing asynchronous workflows; implemented error handling, rate limiting, and structured JSON parsing to ensure reliable operation under high-concurrency scenarios.
- Demonstrated expertise in **Python** development, API integration, workflow automation, and modern deployment pipelines; showcased ability to design reliable, scalable systems and contribute meaningfully to technical decision-making in serverless environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
