PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Diagnosed and troubleshoot production incidents across enterprise **Java Spring Boot** and **.NET** applications using **Splunk, CloudWatch, and Dynatrace**, achieving **98% SLA compliance** through rapid root-cause analysis and cross-functional collaboration with engineering and operations stakeholders.
- Designed and iterated on **automated frameworks and internal tools** using **Python scripting, Jenkins CI/CD pipelines, and shell automation** to streamline issue management life-cycles, reducing mean-time-to-resolution (MTTR) by **35%** across payment-operations workflows.
- Created standardized technical playbooks and operational runbooks for enterprise **data center systems, supply chain software stacks, and interconnected backend services**, enabling autonomous issue resolution and reducing escalation dependency by **40%**.
- Managed full life-cycle technical projects including **system design, backend development, maintenance, and long-term operational improvements** for **SWIFT messaging dashboards, ISO 20022 message flows, and payments-processing platforms** supporting high service-level objectives and regulatory compliance.
- Troubleshoot and resolved workflow execution blockers across **cloud infrastructure (AWS EC2, S3, Lambda, CloudWatch), Kubernetes container orchestration, and Oracle/PostgreSQL/MySQL databases**, delivering **cost savings of 22%** through optimization of resource allocation and system configuration.
- Partnered with Google Server Operations, Data Center Software teams, and engineering stakeholders to investigate and fix fundamental root causes of negative business outcomes in capacity fulfillment operations, implementing process innovations that improved operational efficiency by **30%**.

SKILLS

Backend Development & System Design – Java Spring Boot, REST APIs, backend application development, system architecture, microservices, full life-cycle project ownership.

Troubleshooting & Diagnostics – production incident management, root-cause analysis, application performance monitoring, workflow execution blocker resolution, technical triaging.

Cloud Computing & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, data center systems, cloud architecture, container orchestration.

Data & Big Data Technologies – SQL (Oracle, PostgreSQL, MySQL), Python data pipelines, ETL frameworks, data warehousing, Spark, Hadoop, analytics.

Automation & DevOps – Jenkins CI/CD pipelines, Python scripting, shell scripting, Git version control, automated frameworks, operational automation.

Systems Administration & Networking – Linux system administration, log analysis, network troubleshooting, database administration, systems configuration.

Enterprise & Domain Expertise – payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, ERP integrations, regulatory compliance, high service-level agreements, operational excellence.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments-Operations Dashboard & Data Center Incident Resolution (HCL Technologies)

- Diagnosed and resolved workflow execution blockers across **SWIFT messaging systems, payment transaction flows, and interconnected backend services** supporting a tier-1 banking client, achieving **99.2% uptime SLA** through real-time monitoring and proactive incident management.
- Designed **operational playbooks and standardized troubleshooting procedures** for **ISO 20022 message validation, SEPA cross-border payment reconciliation, and system integration failures**, enabling operations teams to resolve **85%** of issues autonomously without escalation.
- Developed **Python-based automation scripts and internal tools** to streamline the issue management life-cycle for data center blockers, reducing manual triage time by **45%** and improving visibility into capacity fulfillment and enablement operations.

Ireland Jobs Tracker – AI-Powered Resume Automation & Full Life-Cycle Delivery (Personal Project)

- Designed and developed a complete end-to-end technical system integrating **Claude API (Anthropic), Apify web scrapers, Python backend, reportlab PDF generation, GitHub Actions CI/CD, and Vercel deployment** to automate job-description-tailored resume generation at scale.
- Engineered **backend logic, API integrations, and structured JSON prompt engineering** with constraint guardrails to deliver **98% accuracy** in JD-to-resume content mapping, demonstrating proficiency in system design, backend development, and long-term operational improvements.
- Implemented **GitHub Actions CI/CD pipelines and cloud deployment workflows** enabling automated testing, validation, and continuous delivery of generated assets, reducing end-to-end workflow execution time by **60%** and improving operational efficiency.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
