PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **secure, high-quality production code** for enterprise Java Spring Boot microservices supporting mission-critical financial services platforms; implemented **REST APIs** and backend features with full **CI/CD pipeline integration** (Jenkins, Git) achieving **99.5% application uptime** across distributed systems.
- Executed end-to-end **software solutions design, development, and technical troubleshooting** for large corporate environments; debugged and maintained code across **Java, Python, SQL** in high-complexity payments-processing systems handling **10M+ daily transactions**, reducing incident resolution time by **40%**.
- Produced **architecture and design artifacts** for cloud-native applications deployed on **AWS (EC2, S3, Lambda, CloudWatch)**; ensured design constraints were met through **Docker containerisation**, infrastructure-as-code principles, and **application resiliency** patterns in secure, stable, and scalable production environments.
- Gathered, analyzed, synthesized, and developed **visualizations and reporting** from large, diverse financial datasets using **Power BI, Tableau, SQL data modelling**, and **Python (pandas, NumPy)**; delivered **20+ operational dashboards** to continuously improve software applications and reduce MTTR by **35%**.
- Contributed to **software engineering communities of practice** by mentoring junior engineers on **agile methodologies, CI/CD best practices, code review standards**, and emerging technologies; led knowledge-sharing sessions on **cloud-native architecture** and **payments-domain compliance** (GDPR, ISO 20022, SEPA).
- Demonstrated mastery of **Software Development Life Cycle (SDLC)** across **agile environments**; collaborated with cross-functional teams (BAs, operations, compliance) using Jira ticketing and Confluence documentation; executed **UAT coordination, change-control management, and post-go-live support** for interconnected enterprise systems in banking and ERP domains.

SKILLS

Backend & Core Languages – Java Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), REST APIs.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins, Git), Linux, shell scripting.

Data & Analytics – Power BI, Tableau, pandas, NumPy, scikit-learn, SQL data modelling, data warehousing, ETL.

Frontend & Modern Technologies – React, Angular, JavaScript.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, production support, SLA management, incident response.

Domain & Compliance – Financial Services, Payments Processing, SWIFT (MT/MX), ISO 20022, SEPA, GDPR, ERP integration, change-control management.

Agile & Collaboration – Jira, Confluence, Agile/Scrum methodologies, code reviews, cross-functional team leadership.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments Operations Dashboard (HCL Technologies)

- Architected and deployed a **secure, market-leading technology product** for a major banking client's payments-operations platform; implemented **Java Spring Boot backend** with **REST API integrations** enabling real-time transaction-flow visibility and operational alerting for **SWIFT MT/MX message processing**.
- Designed **Power BI and Tableau dashboards** providing financial datasets and reporting to continuously improve system performance; integrated **ISO 20022 message flows, SEPA/cross-border payment data, and reconciliation workflows** with compliance-first architecture supporting **GDPR and regulatory audit trails**.
- Managed production support and **application resiliency** through **Splunk, Dynatrace, and CloudWatch monitoring**; reduced P1/P2 incident response time by **40%** and achieved **99.8% SLA compliance** across mission-critical payment-messaging systems serving **500M+ monthly transactions**.

Ireland Jobs Tracker – AI-Powered Resume Engine (Personal Project)

- Engineered an end-to-end **cloud-native software solution** integrating **Claude API (Anthropic)** with **Python backend (FastAPI)** to automatically generate job-description-tailored resumes; implemented **structured-JSON prompt engineering** and constraint-guardrail validation achieving **98% content accuracy** and **60% time savings** vs. manual resume customization.
- Orchestrated a scalable **CI/CD pipeline** using **GitHub Actions** and **Vercel deployment**; integrated **Apify web scrapers** for JD ingestion, **Claude-powered NLP processing**, and **reportlab PDF generation**, processing **500+ job descriptions monthly** with zero infrastructure downtime.
- Demonstrated advanced **software design and development expertise** through modular architecture, error handling, and **API integration** patterns; applied **agile development practices** and continuous improvement cycles to enhance algorithm performance and user experience across the platform.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
