PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **end-to-end data integration solutions** across disparate banking and ERP systems, implementing **ETL pipelines** using **Python** and **SQL** (PostgreSQL, MySQL, Oracle) to extract, transform, and distribute data from multiple sources to centralized data stores, ensuring **99.5% SLA compliance** in production environments.
- Built scalable **data acquisition and integration architectures** on **AWS** leveraging **S3, Lambda, EC2, and CloudWatch** for real-time monitoring and alerting; optimized data pipeline performance through **Infrastructure as Code (IaC)** patterns and containerization with **Docker**, reducing deployment time by **40%**.
- Implemented **CI/CD pipelines** using **Jenkins, Git, and Maven** for automated cloud deployments; managed **YAML** configurations and artifact repositories to enable reliable, repeatable builds across development, staging, and production environments, reducing deployment failures by **35%**.
- Architected and optimized **Spark-based data pipelines** using **PySpark** for processing large-scale structured and unstructured datasets in **Parquet, ORC, and Avro** formats; engineered high-performance distributed processing jobs that reduced query latency by **50%** and improved data throughput to **500GB/day**.
- Delivered business intelligence integration designs leveraging **Data Warehousing** and **Data Lake** concepts; integrated disparate data sources (SWIFT messaging, payment operations, ERP systems) into unified analytical repositories using **AWS Glue, Athena, and RDS**, enabling cross-functional teams (Product Management, Integration Engineering, Quality Engineering) to consume integrated data for strategic decision-making.
- Collaborated with geographically distributed teams across banking operations, systems administration, and product development to design **scalable, high-performance distributed services** that met complex non-functional requirements; applied **AI-assisted developer productivity tools** and prompt engineering techniques to accelerate development cycles and improve code quality by **30%**.

SKILLS

Cloud Data Platforms & Big Data Technologies – AWS (S3, EC2, Lambda, EMR, CloudWatch, RDS, Athena), Apache Spark, PySpark, Hadoop, Apache Airflow, AWS Glue, Databricks.

Data Integration & ETL Engineering – Data pipeline design and optimization, data acquisition systems, extract-transform-load, data modeling, Data Lake architecture, Data Warehouse design, Delta Lake, Iceberg table formats, Parquet, ORC, Avro.

Programming & Development – Python, Java, SQL (PostgreSQL, MySQL, Oracle), Spring Boot, REST APIs, Flask, FastAPI, Scala.

CI/CD, Infrastructure & DevOps – Jenkins, Git, Maven, Terraform, CloudFormation, Infrastructure as Code (IaC), Docker, YAML, Artifactory, GitHub Actions.

Data Querying, Storage & Analytics – Apache Athena, RDS, DynamoDB, NoSQL data stores, Spark SQL, big data querying tools, data security concepts.

Business Intelligence & Data Analysis – Power BI, Tableau, DAX, Power Query, data visualization, business intelligence integration design, exploratory data analysis.

Domain & Cross-Functional Expertise – SWIFT messaging (MT/MX), ISO 20022 message flows, payments processing, SEPA, financial services, ERP integration, change-control management, regulatory compliance (GDPR), SLA management, incident response.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Payments Operations & SWIFT Messaging Data Integration Platform (HCL Technologies)

- Engineered a **real-time data integration solution** ingesting **SWIFT messaging (MT/MX)** and **ISO 20022** transaction flows from banking operations systems into a centralized **Data Lake** on **AWS S3** using **AWS Glue ETL jobs and Lambda-based schedulers**; processed **2M+ daily SWIFT messages** with **99.9% data fidelity**.
- Designed **scalable Apache Spark PySpark pipelines** to transform raw payment message data (Parquet format) into normalized, queryable datasets; integrated **Delta Lake table formats** for ACID compliance and versioning, enabling audit-trail reconstruction for **regulatory compliance (GDPR, SEPA rules)**.
- Built **Data Warehouse** schema leveraging **AWS RDS (PostgreSQL)** and **Athena** for real-time querying of payment flows, transaction reconciliation workflows, and operational alerting; delivered BI dashboards in **Power BI** for cross-functional teams (operations, compliance, product management) reducing incident triage time by **45%**.
- Implemented **CI/CD automation** using **Jenkins, Git, Maven, and Infrastructure as Code (Terraform)** for reproducible ETL deployments; managed data security policies, **Data Lake governance**, and change-control workflows across development and production environments.

Ireland Jobs Tracker – AI-Powered Resume Generation & Data Pipeline Orchestration (Personal Project)

- Architected an **end-to-end data acquisition and orchestration system** integrating **Apify web scrapers, Claude API (Anthropic), and structured JSON transformation** to ingest job descriptions, apply prompt engineering logic, and generate tailored resume content at scale.
- Engineered **data pipeline automation** using **GitHub Actions** and **Python** for scheduled job scraping, API integration, and **reportlab PDF generation**; deployed scalable application infrastructure on **Vercel**, processing **500+ job descriptions monthly** with **98% success rate**.
- Demonstrated proficiency in **AI-assisted developer productivity** through prompt engineering, API orchestration, and constraint-based guardrails; applied **data transformation and distribution logic** to produce consumable, downstream-ready resume artifacts for multiple audiences.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
