PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **secure, high-quality production code** for enterprise **Java Spring Boot** microservices supporting **3.5M+ daily transactions** in banking and payments infrastructure; maintained **99.9% uptime SLA** through proactive monitoring and synchronous algorithm optimization.
- Executed end-to-end **software design, development, and technical troubleshooting** across large corporate environments using **Java Spring Boot, REST APIs, PostgreSQL, MySQL, Oracle**; debugged and maintained code in **Agile/Scrum** ceremonies with **Git branching, code reviews, and CI/CD pipelines** via **Jenkins**.
- Gathered, analyzed, and synthesized large, diverse financial datasets to develop **operational dashboards, reporting visualizations, and performance metrics** using **Splunk, CloudWatch, Dynatrace**; improved incident detection latency by **40%** through real-time alerting and log analysis.
- Architected and maintained **cloud-native solutions** on **AWS (EC2, S3, Lambda, CloudWatch)** with **Docker containerization** for secure, scalable application deployment; implemented **infrastructure-as-code** principles across payment-operations and enterprise integration workflows.
- Collaborated across cross-functional teams (business analysts, operations, compliance) to translate regulatory and business requirements into **secure, auditable software solutions**; delivered **change-control management, UAT coordination, and post-go-live support** for interconnected enterprise systems in highly regulated financial services environments.
- Contributed to **software engineering communities of practice** by documenting architectural patterns, leading code-review sessions, and mentoring junior engineers on **SDLC best practices, application resiliency, security, and emerging cloud technologies**; fostered team culture of diversity, inclusion, and continuous technical excellence.

SKILLS

Backend & Core Development – Java, Spring Boot, REST APIs, object-oriented design, synchronous/asynchronous algorithms, secure production code.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL query optimization, schema design, data validation, ETL pipelines.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, cloud-native architecture, infrastructure-as-code.

DevOps, CI/CD & Agile – Jenkins pipelines, Git, code reviews, CI/CD, application resiliency, security practices, Agile/Scrum methodologies.

Monitoring, Observability & Analytics – Splunk, CloudWatch, Dynatrace, operational dashboards, real-time alerting, log analysis, performance metrics, visualization.

Financial Services & Regulatory Domains – SWIFT messaging (MT/MX), ISO 20022, payments processing, SEPA, cross-border payments, regulatory compliance, audit trails, data protection, open banking.

Frontend & Full-Stack Technologies – React, Angular, JavaScript, HTML/CSS, responsive design.

EDUCATION AND TRAINING

PROJECTS

Enterprise Banking Payments-Operations Platform (HCL Technologies)

- Executed software design and development of **SWIFT messaging / payments-operations dashboard** supporting **real-time transaction-flow visibility, operational alerting, and production support** for a Tier-1 banking client; maintained **secure, high-quality code** aligned with financial services compliance requirements.
- Gathered, analyzed, and synthesized **large, diverse financial data sets** to produce operational visualizations, SLA metrics, and regulatory-audit reports; improved incident response time by **35%** through enhanced **Splunk and Dynatrace dashboards** with real-time anomaly detection.
- Architected **cloud-native, scalable solutions** on AWS (EC2, S3, Lambda, CloudWatch) integrated with ERP modules and enterprise business systems via **REST APIs and database-level data flows**; implemented **Docker containerization** for secure, auditable payment processing workflows compliant with **ISO 20022, SEPA, and data protection regulations**.
- Collaborated with business analysts, operations teams, and compliance officers to execute **change-control management, UAT coordination, and post-go-live support**; delivered **architecture and design artifacts** ensuring all design constraints met by production code across interconnected financial systems.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)

- Designed and delivered an **end-to-end AI workflow orchestration platform** integrating **Claude API (Anthropic SDK), structured-JSON prompt engineering, and constraint-guardrail algorithms** to generate JD-tailored, high-quality resume content at scale.
- Executed **secure, production-grade code** across data ingestion (**Apify web scrapers**), API orchestration (**Claude-haiku-4-5 inference**), document generation (**reportlab PDF rendering**), and deployment (**GitHub Actions CI/CD, Vercel cloud deployment**); achieved **99.5% end-to-end job-description processing accuracy**.
- Architected **cloud-native, serverless infrastructure** with **GitHub Actions automation and Vercel deployment** to support high-throughput, scalable resume generation; implemented **real-time alerting and monitoring** for reliability and cost optimization.
- Contributed technical artifacts documenting **API design, prompt-engineering patterns, and CI/CD architecture** to support team collaboration and knowledge-sharing; demonstrated proficiency in **emerging AI technologies, software architecture, and full-stack cloud deployment best practices**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
