PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **AWS data warehousing solutions** using **EMR, S3, AWS Glue, and Lambda** to manage data integration from disparate banking and ERP systems, reducing ETL execution time by **40%** and enabling real-time operational reporting across **PostgreSQL, MySQL, and Oracle** data stores.
- Built **PySpark** and **Scala Spark** data pipelines to extract, transform, and distribute payment transaction data across **Parquet, ORC, Avro, and Delta Lake** formats, achieving **99.8% data accuracy** and supporting **50+ downstream analytics dashboards** serving business intelligence teams.
- Implemented Infrastructure as Code using **Terraform and CloudFormation** to provision scalable, high-performance distributed data systems on AWS, reducing infrastructure deployment cycles by **60%** and enabling consistent, repeatable cloud deployments across development, staging, and production environments.
- Orchestrated end-to-end **CI/CD pipelines** using **Jenkins, Git, Artifactory, Maven, and YAML** configuration management for cloud deployments, integrating **Apache Airflow** for workflow orchestration and automated data pipeline scheduling, improving deployment reliability to **99.5%** and enabling daily data refresh cycles.
- Delivered data integration designs and problem-solving expertise for complex, multi-system data analysis across banking and ERP platforms, collaborating with cross-functional teams including Product Management, Integration Engineering, Quality Engineering, and System Administration to define functional and non-functional requirements for **scalable data acquisition and integration solutions**.
- Developed distributed data services supporting **Data Warehousing, Data Modeling, Data Lake, and Data Security** concepts, implementing role-based access controls, encryption at rest and in transit, and audit logging to meet financial services regulatory compliance (GDPR, data protection standards), while achieving **sub-second query performance** on **Athena, RDS, and DynamoDB** queryable data stores.

SKILLS

Cloud & Big Data Technologies – AWS (EMR, S3, Lambda, Glue, Athena, CloudWatch, EC2), Apache Spark, PySpark, Scala, Apache Airflow, Hadoop.

Data Integration & Warehousing – AWS Glue, data pipelines, ETL, data warehousing, data modeling, data lakes, Delta Lake, Iceberg, Parquet, ORC, Avro.

Databases & Data Stores – PostgreSQL, MySQL, Oracle, Amazon RDS, DynamoDB, NoSQL, data modeling, schema design, query optimization.

Infrastructure & DevOps – Terraform, CloudFormation, Infrastructure as Code (IaC), Jenkins, Git, Artifactory, Maven, YAML, CI/CD pipelines, Docker.

Backend & Java Development – Java, Spring Boot, REST APIs, microservices, API standards, open-source frameworks, scalable distributed services.

Business Intelligence & Analytics – Power BI, Tableau, data visualization, DAX, Power Query, business intelligence integration designs, analytical reporting.

Languages & Developer Tools – Python, Java, SQL, R, Git, GitHub Copilot, prompt engineering, shell scripting, Linux.

EDUCATION AND TRAINING

PROJECTS

Payments Operations Data Integration Platform (HCL Technologies)

- Architected and delivered an **AWS data warehousing and integration solution** for a global banking client's payments operations dashboard, ingesting **SWIFT messaging data (MT/MX formats)** and **ISO 20022 message flows** from multiple payment processing systems using **AWS Glue ETL jobs, Lambda functions, and S3 data lakes**, enabling real-time transaction-flow visibility and operational alerting.
- Implemented **PySpark data pipelines** to extract, transform, and load daily payment volumes of **500K+ transactions** into **Delta Lake** format, applying schema validation, deduplication, and SEPA/instant payments reconciliation logic, achieving **99.8% data completeness** and enabling compliance with financial services audit and regulatory requirements.
- Provisioned **Terraform-based Infrastructure as Code** for multi-tier AWS environments, deploying **EMR clusters, Glue catalogs, Lambda functions, and RDS instances** to support both operational data stores and analytical workloads, enabling geographically distributed teams to manage data integration without manual infrastructure overhead.
- Configured **Apache Airflow** orchestration workflows to schedule daily and real-time payment data pipelines, monitoring SLA compliance and P1/P2 incident response through **CloudWatch** dashboards and alerting, reducing incident response time by **50%** and improving operational reliability to **99.9%** uptime.
- Collaborated with banking-domain business analysts and operations teams to gather requirements, define data models, and validate **data security, tokenization, and PSD2/Open Banking compliance** across payment flows, delivering UAT support and post-implementation triage across interconnected ERP and payments systems.

AI-Powered Resume Generation & Job Tracking Automation (Personal Project)

- Engineered an end-to-end **AI workflow automation platform** integrating **Claude API (Anthropic SDK)** with advanced **prompt engineering** and constraint guardrails to generate job-description-tailored resumes at scale, achieving **92% relevance accuracy** and reducing resume customization time by **8 hours per application**.
- Orchestrated multi-stage data pipeline combining **Apify web scrapers** for job description ingestion, **structured JSON prompt engineering** for Claude API calls using **claude-haiku-4-5**, and **reportlab PDF generation** for output delivery, demonstrating mastery of **data acquisition, ETL transformation, and scalable integration workflows**.
- Deployed automated CI/CD infrastructure using **GitHub Actions** and **Vercel**, enabling fully automated job tracking, resume generation, and report publishing on commit, reducing manual deployment overhead by **100%** and enabling rapid iteration on AI-assisted developer productivity tools.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
