PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and evaluated **AI/LLM integration patterns** across production systems, building **Claude API** and **Anthropic SDK** orchestrations for enterprise automation workflows; demonstrated **prompt engineering**, **constraint guardrails**, and **structured-JSON** techniques that reduced manual resume generation time by **80%**.
- Architected system design for **cloud-native AI platforms** using **AWS** (EC2, S3, Lambda, CloudWatch) and **Docker** containerization; contributed to reference architectures and integration diagrams for emerging AI technologies including **LLMs**, **memory systems**, **agentic frameworks**, and **guardrails**.
- Built **proof-of-concept implementations** for **AI coding platforms** (Claude Code, GitHub Actions) integrated with production CI/CD pipelines; documented architecture decisions in formats consumable by both human engineers and **AI agents**, supporting enterprise adoption at scale.
- Conducted technology evaluation and recommendations for **emerging AI capabilities** including embeddings, retrieval-augmented generation (RAG), and multi-step agent workflows; presented architecture assessments to senior technical stakeholders and architecture forums.
- Applied **system design thinking** to interconnected enterprise systems: designed REST API integrations across **AWS cloud platforms** and legacy on-premises infrastructure; ensured architectural coherence across **microservices**, **data pipelines**, and **operational monitoring** in global financial services environments.
- Translated complex **enterprise architecture** concepts into actionable technical guidance; produced architecture documentation, technology radar updates, and integration guides that guided **AI platform adoption** across business units and engineering teams in a regulated, multi-system enterprise landscape.

SKILLS

AI & LLM Technologies – Claude API, Anthropic SDK, prompt engineering, LLMs, RAG (retrieval-augmented generation), embeddings, agentic frameworks, guardrails, structured-JSON generation, constraint-based prompting.

Cloud & Infrastructure Architecture – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD pipeline design, GitHub Actions, system design, cloud-native architecture.

Enterprise Architecture & Integration – system design patterns, reference architectures, technology radar, enterprise landscape mapping, microservices architecture, REST API design, cross-system integration, change-control management.

AI Coding Platforms & Modern Development – Claude Code, GitHub Copilot, Cursor, AI-assisted development, AI agent documentation, code generation, automation workflows.

Data Engineering & Analytics – Python (pandas, NumPy, scikit-learn), SQL (PostgreSQL, MySQL, Oracle), ETL pipeline development, data warehousing, Power BI, Tableau, data modelling, DAX measures.

Backend & Full-Stack Development – Java Spring Boot, REST APIs, Flask, FastAPI, React, Angular, Git, Jenkins, Jira, Confluence, Linux, shell scripting.

Domain & Compliance Knowledge – payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, Open Banking, PSD2, financial regulatory compliance, GDPR, audit trails, SLA management.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Ireland Jobs Tracker – AI Platform & Automation Architecture (Personal Project)

- Designed end-to-end **AI workflow architecture** integrating **Claude API** (haiku-4-5) with scalable job-description processing; orchestrated **agentic system design** combining Apify web scrapers, Claude LLM inference, **prompt engineering** with structured-JSON constraints, and **reportlab PDF generation**.
- Implemented **AI platform integration** across cloud services: **GitHub Actions** CI/CD pipeline, **Vercel deployment**, and API orchestration; demonstrated hands-on proficiency with **AI coding platforms** and modern **system design** for production-grade AI applications.
- Engineered **guardrails and constraint-based prompting** to scale resume generation at **80% accuracy**; applied **architecture documentation** practices suitable for both human engineers and AI agents, directly addressing enterprise AI adoption patterns.

SWIFT Payments Operations Platform – Enterprise AI Integration & Architecture (HCL Technologies)

- Architected **system design** for production payments-operations dashboard supporting **SWIFT messaging** (MT/MX formats) and **ISO 20022 message flows**; designed integrations across **REST APIs**, **PostgreSQL/Oracle databases**, and **cloud monitoring systems** (AWS CloudWatch, Dynatrace) to support **SLA management** and regulatory compliance.
- Contributed **reference architecture documentation** for **enterprise AI adoption** in financial services: mapped **ISO 20022 message structures**, **SEPA payment flows**, and **tokenization concepts** into system design patterns; produced guides enabling business teams and engineers to evaluate emerging AI capabilities for payments processing.
- Led architectural assessment of **emerging AI technologies** (LLMs, guardrails, agentic workflows) for **automated compliance checking** and **transaction-flow visibility**; documented integration patterns and presented architecture recommendations to stakeholders in global financial services environments with **GDPR**, **audit trail**, and **regulatory compliance** requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
