PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **cloud-native services and modern frameworks** on **AWS (EC2, S3, Lambda, CloudWatch)** and integrated **REST APIs** for enterprise payments and banking systems, achieving **99.9% uptime SLA** and reducing incident response time by **40%**.
- Developed scalable, high-quality **Python** applications and **data pipelines** using **pandas, NumPy, scikit-learn** for analytics and ETL workflows; built **Power BI dashboards** and **Tableau visualizations** that improved data-driven decision-making for **50+ business stakeholders** across cross-functional teams.
- Architected and implemented **service-based architectures** and **cloud scalability initiatives** using **Docker containerization, Jenkins CI/CD pipelines, and Git branching strategies**; modernized legacy monolithic systems into microservices, reducing deployment time by **35%**.
- Collaborated with Product Management, QA, Data Science, and operations teams to translate functional requirements into well-designed, scalable technical solutions; supported **cross-functional integration** across payments operations, ERP modules, and interconnected business systems via **API-first design** and **database-level data flows**.
- Applied best engineering practices including **clean code, automated testing, security, and performance optimization** in code reviews and design discussions; contributed to operational excellence through **log analysis, shell scripting, and production monitoring** using **Splunk, Dynatrace, and CloudWatch**.
- Engineered end-to-end **data-driven experimentation workflows** leveraging **Python, Claude API, and cloud deployment automation**; processed large-scale datasets with structured-JSON prompt engineering and analytics pipelines, directly supporting business intelligence and decision-making at enterprise scale.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure, Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions), Git.

Backend & API Development – Python, Java Spring Boot, REST APIs, Flask, FastAPI, service-based architectures, microservices design.

Data Engineering & Analytics – Python (pandas, NumPy, scikit-learn), SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, data warehousing, Databricks, Spark, data modelling.

Business Intelligence & Visualization – Power BI, Tableau, DAX, Power Query, interactive dashboards, data visualization, business analytics.

Monitoring & Operational Excellence – Splunk, Dynatrace, CloudWatch, incident management, SLA management, log analysis, shell scripting, Linux.

Domain Expertise – Payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, PSD2, Open Banking, ERP integration, change-control management, enterprise systems architecture.

Machine Learning & Advanced Analytics – Supervised and unsupervised learning, statistical analysis, A/B testing, time-series analysis, scikit-learn, R, RStudio, hypothesis testing.

EDUCATION AND TRAINING

PROJECTS

Business Experimentation & Analytics Platform (HCL Technologies – Payments & Banking Domain)

- Designed and implemented **scalable cloud-native services** supporting real-time data-driven decision-making for enterprise banking clients; built **REST APIs** and **backend systems** deployed on **AWS cloud infrastructure** with **auto-scaling capabilities** and **fault tolerance**.
- Developed **Power BI dashboards** and **Tableau visualizations** for operational analytics across payments flows, transaction monitoring, and SLA compliance; integrated **data pipelines using Python, pandas, and ETL workflows** to process daily transaction volumes of **10M+ messages** with **99.8% accuracy**.
- Architected **service-based architectures** connecting payments operations, ERP modules, and core banking systems via **API-first design patterns** and **database-level data flows** across PostgreSQL, Oracle, and MySQL; implemented **change-control management** and cross-system integration for **3 major platform releases**.
- Contributed to modernization efforts by refactoring monolithic services into **containerized microservices using Docker and Kubernetes**; established **Jenkins CI/CD pipelines** and **automated testing frameworks**, reducing deployment time from **4 hours to 45 minutes**.

Ireland Jobs Tracker – AI-Powered Resume Automation & Analytics Engine

- Engineered end-to-end **data-driven experimentation platform** integrating **Claude API (Anthropic SDK)** with job market analytics; orchestrated **cloud-native ETL pipelines** using **Python, structured-JSON prompt engineering, and constraint guardrails** to generate **tailored resume content at scale**.
- Built **automated data ingestion workflows** leveraging **Apify scrapers → Claude API → reportlab PDF generation**, processing **500+ job descriptions** weekly with **dynamic data transformation** and real-time analytics output.
- Deployed **cloud-scalable application** via **GitHub Actions CI/CD pipelines** and **Vercel cloud infrastructure**; implemented **monitoring dashboards** and **performance optimization** achieving **2-second API response times** and **99.5% uptime**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
