PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **full-stack system integrations** across **Java Spring Boot** microservices and **PostgreSQL/Oracle** databases, enabling **real-time data synchronization** for enterprise payment-processing systems and reducing cross-system latency by **40%**.
- Built and maintained **production infrastructure** for mission-critical banking applications using **AWS (EC2, S3, Lambda, CloudWatch)**, **Docker containerization**, and **Jenkins CI/CD pipelines**; achieved **99.8% SLA uptime** through proactive **Splunk and Dynatrace monitoring**, incident response automation, and root-cause analysis.
- Engineered **Python automation frameworks** and **ETL data pipelines** to ingest, validate, and reconcile **SWIFT messaging (MT/MX)** and **ISO 20022 payment flows** across multiple banking operational systems, processing **10M+ daily transactions** with **99.95% data accuracy**.
- Orchestrated **end-to-end AI workflow automation** leveraging **Claude API (Anthropic)**, **prompt engineering**, and **structured JSON schema design** to generate job-description-tailored content at scale; deployed via **GitHub Actions CI/CD** and **Vercel**, demonstrating hands-on **LLM integration** and **API orchestration** expertise.
- Delivered **advanced data analytics and business intelligence dashboards** using **Power BI and Tableau**, implementing **DAX measures**, **Power Query ETL**, and **data modelling** best practices to provide real-time operational visibility across **payments processing**, **reconciliation workflows**, and financial reporting to **C-level stakeholders**.
- Supported **regulatory compliance** and **change-control management** for **GDPR/Data Protection** requirements and **payments-domain regulations** (SEPA, PSD2, Open Banking standards); coordinated **UAT**, **post-implementation triage**, and cross-functional **integration testing** across interconnected ERP and operational systems.

SKILLS

Programming Languages & Frameworks – Java, Spring Boot, Python, Flask, FastAPI, REST API development, Angular, React.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux, shell scripting, Jenkins, Git.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL optimization, ETL pipeline design, data warehousing, Apache Spark, Hadoop.

Data Analytics & Business Intelligence – Power BI, Tableau, DAX, Power Query, data modelling, statistical analysis, R, RStudio, Python (pandas, NumPy, scikit-learn).

Monitoring, Observability & Incident Management – Splunk, Dynatrace, CloudWatch, SLA management, P1/P2 incident response, production support.

Financial Services & Payments Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, PSD2, Open Banking, payments processing, reconciliation workflows, tokenization, cross-border payments.

AI/ML & Automation – Claude API, Anthropic SDK, prompt engineering, LLM integration, workflow automation, GitHub Actions, Vercel, API orchestration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

SWIFT Payments Operations & Monitoring Dashboard (HCL Technologies)

- Architected and deployed a **real-time transaction-flow visibility platform** for enterprise banking payments processing, integrating **SWIFT messaging (MT/MX)** ingestion, **ISO 20022 message parsing**, and **operational alerting** to support **mission-critical SLA management** and regulatory compliance.
- Implemented **multi-layered monitoring and observability** using **Splunk dashboards**, **Dynatrace APM**, and **CloudWatch alerts** to detect payment anomalies, reconciliation failures, and transaction-flow disruptions; reduced **mean time to detection (MTTD)** by **65%** and enabled **sub-minute incident response**.
- Built **Python ETL automation** to synchronize **SEPA, cross-border, and instant payment workflows** across **PostgreSQL and Oracle** backends; engineered **data validation and audit-trail logging** to enforce **GDPR and financial-services regulatory compliance**, processing **8M+ daily payment messages** with **zero reconciliation gaps**.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)

- Engineered a full-stack **LLM-driven automation platform** using **Claude API (Anthropic)**, integrating **Apify web scrapers** for job-description ingestion, **prompt engineering with structured JSON constraints**, and **reportlab PDF generation** to produce job-tailored resumes at scale.
- Orchestrated **end-to-end AI workflow automation** combining job-description parsing, **Claude-haiku-4-5 inference**, content generation, and document output; deployed via **GitHub Actions CI/CD pipeline** to **Vercel serverless architecture**, demonstrating production-grade **LLM integration, API orchestration**, and **cloud deployment** expertise.
- Implemented **constraint-based prompt engineering** with dynamic guardrails to ensure compliance with resume-structure requirements and ATS optimization; achieved **95% resume-quality acceptance rate** and reduced manual resume-writing time by **80%** across **50+ job applications**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
