PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **full-stack microservices** using **Java Spring Boot** and **REST APIs** on **AWS** (EC2, S3, Lambda), reducing application latency by **18%** and enabling horizontal scaling across production environments supporting **500K+ daily transactions**.
- Built and maintained **CI/CD pipelines** with **Jenkins** and **Git**, automating deployment workflows for **12+ enterprise services** and reducing mean time to deployment by **35%** through infrastructure-as-code and automated testing integration.
- Engineered **Python data pipelines** and **ETL workflows** using **pandas, NumPy, and SQL** (PostgreSQL, MySQL, Oracle) to process **2M+ daily records**, enabling real-time operational dashboards and **99.2% data accuracy** for financial reconciliation systems.
- Led production incident response and **application reliability** using **Splunk, CloudWatch, and Dynatrace**, achieving **99.8% uptime SLA** through proactive monitoring, root-cause analysis, and cross-functional collaboration with platform and operations teams.
- Containerized legacy enterprise applications using **Docker** and orchestrated deployment configurations, reducing infrastructure provisioning time by **40%** and standardizing development environments across **8-person distributed engineering team**.
- Collaborated with banking and financial-services stakeholders to deliver **SWIFT messaging integrations, ISO 20022 compliant payment flows**, and regulatory implementations (GDPR, data protection), ensuring **100% audit-trail integrity** and cross-border payment processing across **SEPA and instant payment networks**.

SKILLS

Backend & Full-Stack Development – Java, Spring Boot, Python, Flask, FastAPI, REST APIs, microservices architecture.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, Linux, shell scripting.

DevOps & CI/CD – Jenkins, Git, GitHub Actions, CI/CD pipelines, infrastructure automation, change management.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, data pipelines, ETL workflows, data warehousing, schema design.

Application Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, incident management, SLA management, production support, observability.

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling, interactive dashboards, statistical analysis, R, scikit-learn.

Domain Expertise & Compliance – Banking & financial services, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, instant payments, GDPR, regulatory compliance, ERP integration, payments processing.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments Operations & Monitoring Dashboard (HCL Technologies)

- Architected and maintained a **full-stack payments operations platform** supporting **3M+ SWIFT messages monthly** across international banking networks, integrating **Java Spring Boot backend APIs** with **real-time CloudWatch and Dynatrace monitoring** for transaction-flow visibility and operational alerting.
- Implemented **ISO 20022 compliant message parsing and validation** workflows using **Python ETL pipelines**, reducing payment reconciliation errors by **22%** and enabling automated settlement workflows across **SEPA and cross-border payment channels**.
- Built **SQL-driven operational dashboards** in **Power BI** tracking SLA metrics, P1/P2 incident response times, and payment-status reporting for compliance teams, achieving **100% audit-trail integrity** and **GDPR-compliant data handling** across all financial transactions.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)

- Engineered an end-to-end **full-stack automation platform** combining **Python backend**, **Claude API (Anthropic) integration**, and **structured prompt engineering** to generate **JD-tailored resumes at scale** with **98% accuracy** in content matching and constraint guardrails.
- Designed scalable **ETL and data orchestration workflows** integrating **Apify web scrapers**, job-description ingestion pipelines, **Claude-haiku-4-5 LLM calls**, **reportlab PDF generation**, and **GitHub Actions CI** for automated deployment to **Vercel**, processing **500+ job descriptions monthly**.
- Implemented **prompt engineering techniques** and **API integration patterns** with the **Anthropic SDK**, achieving production-grade reliability through structured JSON outputs, error handling, and cost optimization (**23% reduction in token usage**)—directly applicable to LLM-powered backend services and AI workflow orchestration.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
