PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **business systems analysis and requirements gathering** for enterprise banking operations, translating stakeholder needs into technical specifications and system configurations that reduced payment-processing SLA breaches by **18%**.
- Designed and deployed **operational dashboards and reporting workflows** using **Power BI** and **Tableau** to track payments processing metrics, transaction flows, and system health across interconnected ERP and business systems, enabling real-time visibility for **50+ business users**.
- Conducted **data analysis and business intelligence reporting** on **PostgreSQL, MySQL, and Oracle** databases to support post-implementation UAT, reconciliation workflows, and regulatory compliance audits; authored **SQL queries** for ad-hoc business questions and KPI measurement.
- Managed **system integrations and cross-functional change control** across enterprise ERP modules and operational platforms via **REST API integrations** and database-level data synchronization, ensuring data consistency and **99.2% uptime** in production environments.
- Led **incident response and application support** for mission-critical banking and payments systems using **Splunk, CloudWatch, and Dynatrace** for root-cause analysis; implemented **Python automation scripts** and **ETL data pipelines** to reduce manual incident triage by **35%**.
- Supported **regulatory compliance implementation** including **GDPR, ISO 20022 message flows, SEPA processing, and PSD2 open banking standards** through change-management coordination, testing oversight, and audit-trail validation across interconnected systems.

SKILLS

Business Systems & Data Analysis – business systems analysis, requirements gathering, stakeholder management, operational reporting, KPI measurement, data-driven insights.

Business Intelligence & Analytics Platforms – Power BI, Tableau, Power Query, DAX, data modelling, interactive dashboards, published reports.

Databases & Data Warehousing – PostgreSQL, MySQL, Oracle, SQL query optimization, schema design, data warehousing, ETL, reconciliation workflows.

Enterprise Systems & Integration – ERP systems, business process flows, REST API integrations, system interconnections, change-control management, post-implementation support.

Data Engineering & Automation – Python scripting, ETL pipelines, data validation, Jenkins CI/CD, Git, scheduled reporting, workflow orchestration.

Monitoring, Compliance & Operations – Splunk, CloudWatch, Dynatrace, incident management, SLA management, GDPR, ISO 20022, SEPA, PSD2, regulatory compliance, audit trails.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments Operations & Business Systems Dashboard (HCL Technologies)

- Architected and maintained an **enterprise payments operations dashboard** for a tier-1 banking client, providing real-time visibility into **SWIFT messaging (MT/MX formats), ISO 20022 message flows, and cross-border payment transactions** across interconnected systems.
- Performed **business systems analysis and requirements translation** from banking operations teams and regulatory stakeholders; designed **operational KPI reporting** and reconciliation metrics using **Power BI dashboards** to track payment throughput, SLA compliance, and transaction-flow integrity.
- Implemented **data pipelines and ETL workflows** using **Python and SQL** to ingest **PostgreSQL and Oracle** transaction data, validate payment records, and populate analytics databases; automated daily **scheduled reporting** for **25+ business operations users** covering SEPA, instant payments, and compliance audits.
- Reduced incident detection and root-cause analysis time by **40%** through **Splunk and CloudWatch** monitoring configuration, alerting rules, and log-analysis automation for production payments systems; supported **P1/P2 incident response** and system reliability.
- Coordinated **change-control management and post-implementation support** for **GDPR, PSD2 open banking, and regulatory compliance** system updates; validated **audit trails, data protection controls, and ISO 20022 message processing** across interconnected ERP and business systems.

Ireland Jobs Tracker – AI-Driven Business Systems & Data Automation (Personal Project)

- Engineered an end-to-end **data pipeline and business automation workflow** that ingests job descriptions, performs **data analysis and transformation**, and generates tailored outputs at scale using **Claude API (Anthropic) prompt engineering** and **structured-JSON data processing**.
- Integrated **Apify web scraping, job-description data ingestion, Python ETL logic, and API orchestration** to create a **fully automated reporting system** with **GitHub Actions CI/CD deployment to Vercel**; processed **500+ business documents monthly** with **99.1% accuracy**.
- Designed **data models, constraint guardrails, and prompt-engineering patterns** to ensure business-logic consistency and output validation; demonstrated expertise in **AI systems integration, workflow automation, and data-driven decision support** aligned with modern business systems analysis requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
