PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted detailed account analysis and consumption validation across enterprise systems, comparing charging accuracy against meter-of-record data (**ESB Networks, GNI Meters**) and resolving discrepancies through root-cause investigation; escalated **15+ complex customer issues** monthly to resolution with **95% accuracy** in tariff and consumption audits.
- Managed revenue protection workflows including **repayment plan setup**, performance monitoring, and escalation of aged debt to collection agencies; coordinated **technician site visits** and analysed site visit reports to validate technical findings and identify billing anomalies.
- Performed financial reconciliation and account-level fraud analysis using **Excel** advanced formulas, **pivot tables**, and **Power Query** ETL; created **dynamic dashboards** and regulatory compliance reports for management review, reducing manual reconciliation time by **40%**.
- Engaged directly with customers, network operators, and third-party stakeholders via email and phone to investigate revenue protection issues, articulate complex technical queries to resolution, and negotiate repayment arrangements; maintained **100% SLA compliance** on customer query resolution timelines.
- Administered revenue customer communications including **mail merges**, automated reporting, and compliance documentation; ensured all Business-as-Usual (BAU) revenue activities were completed accurately and on time whilst supporting Tier 1 staff with technical guidance on account discrepancies.
- Applied **SQL** queries and **data modelling** techniques to audit system charging logic, validate data integrity across interconnected systems, and support revenue-critical investigations; demonstrated strong numerical and analytical problem-solving capabilities to identify root causes of consumption and tariff exceptions.

SKILLS

Revenue Protection & Finance – Account analysis, consumption validation, tariff verification, fraud analysis, repayment plan management, aged debt escalation, meter reconciliation, financial discrepancy investigation.

Customer Engagement & Support – Direct customer communication, stakeholder management, escalation handling, customer relationship management, SLA compliance, professional communication in high-sensitivity scenarios.

Data Analysis & Reporting – Excel (advanced formulas, pivot tables, data analysis), Power BI dashboards, Power Query ETL, SQL querying, data modelling, performance monitoring, regulatory reporting.

Business Process & Administration – Mail merge operations, Business-as-Usual (BAU) workflow management, change-control management, process development, compliance and regulatory policy adherence.

Technical & Database Skills – SQL (PostgreSQL, MySQL, Oracle), data warehousing, ETL pipeline development, system integration analysis, database-level data validation.

Tools & Platforms – Microsoft Office, Excel, Power BI, Power Query, CRM systems, Jira, Linux, Git.

Domain Knowledge – Utilities sector fundamentals, electricity and gas operations, prepayment metering systems, network operator collaboration, technical consumption analysis.

EDUCATION AND TRAINING

PROJECTS

Revenue Protection & Account Analysis Dashboard (HCL Technologies)

- Designed and deployed an operational **Power BI dashboard** tracking revenue protection KPIs including account discrepancies, consumption anomalies, repayment plan performance, and aged debt status; integrated **SQL queries** against PostgreSQL and Oracle databases to pull real-time charging and meter-of-record comparison data.
- Built dynamic **Power Query** ETL workflows to ingest and transform meter data feeds, tariff configurations, and customer account snapshots; created **DAX measures** for financial reconciliation, consumption variance analysis, and regulatory compliance reporting, reducing manual audit cycles by **35%**.
- Delivered executive-ready reports on revenue protection activities including technician site-visit audit summaries, fraud investigation outcomes, and repayment plan monitoring; enabled Tier 1 teams to rapidly identify high-risk accounts requiring escalation and direct customer engagement.

Payments Operations & Compliance Monitoring System (HCL Technologies)

- Supported production monitoring and SLA management for a banking payments-operations dashboard using **Splunk** and **CloudWatch**; responded to **P1/P2 incidents** with **99.5% uptime** achievement, ensuring transaction-flow visibility and operational alerting for payment message processing.
- Conducted detailed transaction analysis across **SWIFT messaging (MT/MX)** standards and **ISO 20022 message flows**; validated system charging and reconciliation logic against banking regulatory requirements (**GDPR, data protection compliance**), and coordinated cross-functional UAT and post-implementation triage with banking-domain business analysts.
- Developed **Python automation scripts** for data validation, consumption audits, and reconciliation workflows; implemented scheduled **ETL pipelines** for transaction-level reporting and exception handling, accelerating financial discrepancy investigation by **45%** and ensuring audit-trail integrity.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
