PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided first and second-line support for business-critical **ERP systems, financial platforms**, and operational dashboards across a banking enterprise; maintained **SLA compliance** and orchestrated **P1/P2 incident response** with **99.2% uptime achievement** using **Splunk, Dynatrace**, and **CloudWatch** monitoring.
- Designed and deployed **reporting dashboards** and **data visualisation templates** using **Power BI** and **SQL queries** to improve operational decision-making across finance, HR, and engineering workflows; delivered **15+ automated reporting pipelines** that reduced manual data compilation by **60%**.
- Managed software installations, system upgrades, and **data migrations** across interconnected platforms including **PostgreSQL, MySQL**, and **Oracle** databases; coordinated **UAT testing** and **post-implementation support** to ensure minimal disruption during enterprise system rollouts.
- Ensured **GDPR compliance** and **IT security standards** across production environments; implemented **data protection controls**, maintained audit trails, and supported IT compliance audits for regulated financial systems; demonstrated mastery of **data governance** and **regulatory frameworks**.
- Developed **process automation** and **system integrations** using **Python scripting, REST APIs**, and **CI/CD pipelines (Jenkins, Git)**; automated cross-system data flows and delivered **12 integration projects** connecting finance, HR, and engineering tools with **99.8% data accuracy**.
- Delivered comprehensive **end-user training**, technical documentation, FAQs, and user guides for business-critical software; liaised with non-technical stakeholders to gather requirements and communicate technical solutions; demonstrated proactive problem-solving and adaptability in fast-paced enterprise environments.

SKILLS

Backend & Systems Development – Java, Spring Boot, Python, C# fundamentals, REST API development, system architecture, application performance tuning.

Software Support & Maintenance – First and second-line application support, ERP system administration, software installation & configuration, incident management, vendor liaison, troubleshooting & diagnostics.

Systems Administration & Integration – System performance monitoring, backups & disaster recovery, data migrations, CI/CD pipelines (Jenkins), version control (Git), cloud platforms (AWS EC2, S3, Lambda).

Database & Data Engineering – SQL (PostgreSQL, MySQL, Oracle), schema design & optimization, ETL pipelines, data warehousing, ad-hoc queries, data validation, query performance tuning.

Business Intelligence & Reporting – Power BI dashboards, Tableau, data modelling, DAX measures, Power Query, business reporting, operational KPI tracking.

Security, Compliance & Governance – GDPR compliance, IT security standards, data protection controls, audit trail management, regulatory implementation, IT compliance frameworks.

Collaboration & Communication – Cross-functional stakeholder liaison, technical documentation, end-user training, Agile/Scrum ceremonies (Jira, Confluence), requirements gathering, UAT coordination.

EDUCATION AND TRAINING

PROJECTS

ERP Systems & Payments Operations Support (HCL Technologies)

- Engineered production support and real-time **system monitoring** for mission-critical **ERP systems** and **financial platforms** supporting a major banking client; maintained **business-critical software reliability** with **continuous performance monitoring** across integrated finance, HR, and operational modules.
- Developed **operational dashboards** and **process improvement workflows** using **SQL queries** and **data modelling** to track system integration health, transaction flows, and SLA metrics; reduced manual monitoring overhead by **50%** and improved **system visibility** for cross-functional engineering and operations teams.
- Coordinated **system upgrades**, **data migrations**, and **post-implementation support** across interconnected **ERP modules** and **financial systems**; managed change-control documentation, **UAT testing coordination**, and stakeholder communication to ensure compliance with **regulatory requirements** and **GDPR standards**.

Process Automation & System Integration Framework (HCL Technologies & Personal Project)

- Architected end-to-end **process automation** solutions using **Python scripting**, **REST APIs**, and **CI/CD pipelines (Jenkins, Git)** to integrate business-critical systems; delivered **12+ integration projects** connecting finance, HR, CAD, and project management platforms with **99.8% data accuracy** and **40% reduction in manual workflows**.
- Engineered **automation frameworks** and **data pipeline orchestration** using **Python** for ETL, scheduled reporting, and cross-system data synchronization; implemented **CloudWatch** and **Lambda** for serverless automation, reducing infrastructure costs by **35%** and improving system responsiveness.
- Demonstrated **proactive problem-solving** and **self-starter mindset** by identifying process inefficiencies and recommending digital tools and automation opportunities; delivered **continuous improvement initiatives** that enhanced system reliability, stakeholder satisfaction, and operational efficiency across multiple business units.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
