PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and executed comprehensive test cases for Java Spring Boot REST APIs and Web UI automation, achieving **94% test coverage** across enterprise banking and payments systems; collaborated with development teams and product managers to clarify requirements and assess test feasibility.
- Wrote and maintained automation test scripts using **Java, Python, and TestNG** frameworks for API and Web UI automation; optimized automation test frameworks to improve stability and maintainability, reducing test execution time by **35%** and defect escape rate by **28%**.
- Executed test cases, recorded and tracked bugs in **Jira**, generated test reports with detailed root-cause analysis, and ensured timely fixes through cross-functional collaboration with development teams to support production releases and regulatory compliance audits.
- Performed API automation testing on RESTful endpoints and SWIFT messaging flows using **Postman and Python requests library**; validated HTTP protocols, request/response payloads, and error handling across payment-processing integrations with **ISO 20022 message flows**.
- Conducted Web UI automation testing with dynamic elements and asynchronous page loading in banking dashboards; implemented performance testing and load-testing validations to enhance product quality and SLA compliance across **CloudWatch and Dynatrace** monitoring platforms.
- Integrated **Jenkins CI/CD pipelines** with automation test suites, maintained version control via **Git**, and collaborated with development teams to continuously learn and adopt new testing tools and technologies; demonstrated strong problem-solving and quality awareness through defect root-cause analysis and prevention strategies.

SKILLS

Programming Languages – Java, Python, SQL.

Automation Testing Tools & Frameworks – Selenium, Postman, JMeter, TestNG, pytest, Playwright, Appium.

API & Web Automation Testing – RESTful API testing, HTTP protocols, Web UI automation, dynamic elements handling, asynchronous page loading, Postman automation, Python requests library.

Testing Methodologies – test case design, test coverage analysis, defect management, performance testing, load testing, regression testing, functional testing, UAT coordination.

CI/CD & DevOps – Jenkins pipelines, Git version control, CI/CD integration, automated test execution.

Defect & Quality Management – Jira, test reporting, root-cause analysis, SLA management, quality assurance, compliance testing (GDPR, regulatory).

Banking & Payments Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, RESTful API integrations, payment processing, cross-border payments, SEPA, production support, incident response.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Banking Payments Operations Dashboard – Automation Test Suite (HCL Technologies)

- Designed and implemented comprehensive automation test cases for SWIFT messaging dashboard with REST API and Web UI automation; achieved **96% test coverage** across payment-message workflows, transaction-flow visibility, and operational alerting functionality.
- Developed **Java TestNG and Python pytest**-based test frameworks for API automation of payment-processing endpoints; validated **ISO 20022 message flows**, HTTP protocol compliance, and error-handling across SEPA and cross-border payment integrations.
- Integrated automation test suites into **Jenkins CI/CD pipelines** with automated execution on code commits; reduced manual testing effort by **40%**, improved defect detection time by **50%**, and ensured **99.5% SLA** compliance for production payment systems.
- Collaborated with banking-domain business analysts and operations teams to assess test feasibility, conduct UAT support, and perform post-implementation triage; maintained defect tracking and test reports in **Jira** with root-cause analysis for regulatory audit trails and GDPR compliance.

Enterprise ERP Integration Test Automation (HCL Technologies)

- Designed test cases and automation scripts for cross-system ERP integrations and REST API data flows across **PostgreSQL, Oracle, and MySQL** databases; validated change-control management for system configuration updates and post-go-live support.
- Implemented **Postman API automation** and **Python-based performance testing** for interconnected enterprise business systems; conducted load testing and performance validation to ensure system stability and reliability under production workloads.
- Executed Web UI automation testing with **Selenium** for ERP module workflows, handling dynamic elements and asynchronous page loading; generated comprehensive test reports and collaborated with development teams to resolve defects and improve product quality.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
