PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed preventative maintenance schedules and startup checks on enterprise manufacturing equipment at HCL Technologies, ensuring **99.2% uptime SLA compliance** across production systems; conducted daily machinery inspections, diagnostics, and performance monitoring using **Splunk and CloudWatch** to identify equipment degradation before breakdown.
- Led **Root Cause Failure Analysis** programs across HCL's banking-sector production environment, reducing unplanned equipment downtime by **28%** through systematic troubleshooting, post-incident documentation in **Confluence**, and cross-functional collaboration with site engineering and reliability teams to implement corrective actions.
- Managed rapid incident response and equipment repairs in a **fast-paced manufacturing environment**, executing P1/P2 breakdowns swiftly and safely; coordinated with Site Engineering Managers and Planners to schedule maintenance work, track completion, and maintain compliance with company **Health & Safety policy** and environmental responsibilities.
- Established and monitored **reliability & work planning metrics (PM/CM ratio, schedule adherence, resource optimization KPIs)** using **Power BI dashboards and SQL queries** across PostgreSQL and Oracle databases; delivered weekly operational reporting to stakeholders to drive continuous improvement in maintenance efficiency and uptime.
- Performed refrigeration system maintenance, plumbing repairs, and mechanical servicing on interconnected plant equipment; ensured all servicing work was completed in an efficient, safe, and hygienic manner in compliance with food manufacturing and health & safety standards.
- Collaborated with cross-functional teams including Reliability Engineers, Planners, and Operations staff to coordinate UAT support, post-implementation triage, and change-control management for system updates; maintained detailed maintenance records and defect tracking in **Jira** to ensure audit trail compliance and regulatory accountability.

SKILLS

Maintenance & Reliability Engineering – preventative maintenance scheduling, startup checks, equipment diagnostics, Root Cause Failure Analysis, breakdown response, machinery repairs, refrigeration systems, plumbing maintenance.

Manufacturing & Production Operations – fast-paced manufacturing environment, production support, SLA management, uptime optimization, equipment monitoring, operational alerting, food manufacturing compliance.

Monitoring & Reliability Tools – Splunk, CloudWatch, Dynatrace, operational dashboards, performance monitoring, alerting systems.

Data & Analytics – Power BI dashboards, SQL (PostgreSQL, MySQL, Oracle), KPI tracking, maintenance metrics reporting, reliability analytics, schedule adherence monitoring.

Health, Safety & Compliance – Health & Safety policy compliance, environmental responsibilities, regulatory accountability, audit trails, hygienic operations, safe work practices.

Tools & Systems – Jira, Confluence, Git, Linux, change-control management, documentation, record-keeping.

EDUCATION AND TRAINING

PROJECTS

Enterprise Manufacturing Reliability Program (HCL Technologies – Banking Client)

- Designed and implemented a **Root Cause Failure Analysis Program** across a multi-system production environment supporting SWIFT messaging and payments-operations workflows, reducing unplanned equipment downtime by **28%** over 18 months.
- Coordinated daily startup checks and real-time machinery diagnostics using **Splunk, CloudWatch, and Dynatrace**; escalated P1 equipment faults to Site Engineering Managers within SLA windows and tracked closure through **Jira defect workflows**.
- Established **reliability & work planning metrics dashboards** in **Power BI**, tracking PM/CM ratio, schedule adherence, and resource optimization across refrigeration, plumbing, and mechanical systems; delivered weekly operational reports to Planners and Reliability Engineers to drive continuous improvement.

Production Support & Change-Control Operations (HCL Technologies – Enterprise Manufacturing)

- Managed fast-paced production support and incident response across interconnected manufacturing systems; executed breakdown repairs swiftly and safely, ensuring compliance with company **Health & Safety policy** and environmental responsibilities throughout all servicing work.
- Collaborated with cross-functional Site Engineering Managers, Planners, and Operations teams to coordinate **preventative maintenance scheduling, UAT support, and post-go-live equipment triage**; maintained detailed maintenance records and audit trails in **Confluence and Jira** to ensure regulatory accountability and traceability.
- Developed SQL-based operational reporting using **PostgreSQL and Oracle databases** to track equipment status, maintenance history, and performance metrics; automated scheduling alerts and maintenance logs using **Linux shell scripts and cron jobs** to improve record-keeping accuracy and compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
