

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **CI/CD pipelines** using **Jenkins** and **GitHub Actions**, automating build, test, and deployment workflows for enterprise Java/Spring Boot and Python applications in production environments; reduced deployment time by **40%** through pipeline optimization and infrastructure automation.
- Architected and deployed **Infrastructure as Code** solutions using **Terraform** and **Ansible** to provision and manage **AWS** cloud infrastructure (**EC2, S3, Lambda, CloudWatch**); implemented automated infrastructure provisioning reducing manual configuration overhead by **60%**.
- Implemented comprehensive **monitoring and logging stacks** leveraging **Splunk, Dynatrace, CloudWatch, and Prometheus** to instrument AI-driven applications; designed alerting rules and dashboards that reduced Mean Time to Resolution (MTTR) for P1/P2 incidents by **35%** across production systems.
- Containerized enterprise applications using **Docker** and orchestrated microservices with **Kubernetes, Helm, and Kyverno**; managed container security policies and network policies (**CNI**) to ensure secure, scalable deployment of AI commerce platform components across multi-region environments.
- Integrated **automated security scanning (Snyk, Bandit)** and **secrets management** into CI/CD pipelines; promoted DevOps and security best practices across engineering, QA, and data teams to achieve **zero high-severity vulnerabilities** in production deployments.
- Developed **Python**-based automation scripts and infrastructure tooling for ETL data pipelines, operational dashboards, and cross-system integrations; collaborated with cross-functional teams on change-control management, UAT coordination, and post-deployment optimization of cloud-native platforms.

SKILLS

CI/CD & Automation – Jenkins, GitHub Actions, Azure DevOps, Git, Jira, infrastructure automation.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure, Docker, Kubernetes, Helm, Kustomize, Kyverno, CNI.

Infrastructure as Code – Terraform, Bicep, Ansible, configuration management, cloud provisioning.

Programming & Scripting – Python, Java, Spring Boot, Bash, shell scripting, REST APIs.

Monitoring, Logging & Observability – Splunk, Dynatrace, CloudWatch, Azure Monitor, Application Insights, Prometheus, Grafana, Elasticsearch.

Security & DevOps Practices – Snyk, Bandit, secrets management, container security, CI/CD pipeline security, Linux, development workflows.

Data & Databases – SQL (PostgreSQL, MySQL, Oracle), data pipelines, ETL, Power BI, Tableau.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

AI-Driven Payments Operations Platform – Infrastructure & Reliability (HCL Technologies)

- Architected end-to-end **CI/CD pipelines** using **Jenkins** and **GitHub Actions** to automate build, test, and secure deployment of AI-driven payments-operations dashboard supporting real-time SWIFT MT/MX message flows; integrated **automated security scanning (Snyk, Bandit)** and secrets management to ensure regulatory compliance (GDPR, PSD2) and **zero high-severity vulnerabilities** in production.
- Deployed containerized microservices using **Docker, Kubernetes, Helm, and Kyverno** across multi-region **AWS** infrastructure; designed network policies (**CNI**) and container security controls for ISO 20022 message processing, achieving **99.95% platform availability** and sub-second message latency for cross-border SEPA payments.
- Implemented comprehensive monitoring and logging stack using **Splunk, Dynatrace, and CloudWatch** with custom dashboards and alerting for SLA-driven incident management; reduced MTTR for P1/P2 incidents by **35%** through proactive anomaly detection on transaction-flow visibility and operational alerting.

AI Resume Automation & Deployment Pipeline (Ireland Jobs Tracker – Personal Project)

- Orchestrated end-to-end **CI/CD automation** using **GitHub Actions** to deploy AI-driven resume-generation service; integrated **Claude API (Anthropic SDK)** with structured **Python** scripting for JD-tailored content generation, achieving fully automated workflow from job scraping through PDF generation to **Vercel** deployment.
- Engineered infrastructure automation pipeline leveraging **GitHub Actions** for continuous integration, testing, and deployment; implemented environment management and secrets handling for secure API integration, demonstrating hands-on expertise in modern DevOps practices and cloud-native deployment patterns.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
