+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Operated and managed **high-availability AWS services** (EC2, S3, Lambda, CloudWatch) across production environments, resolving **P1/P2 incidents** with **SLA-driven reliability** targets and on-call rotation participation for out-of-hours availability.
- Designed and implemented **automation scripts** in **Python** and **Linux shell** for operational workflows, reducing manual incident response time by **40%** and enabling continuous improvements in system efficiency and performance.
- Developed **operational dashboards** using **CloudWatch, Splunk, and Dynatrace** for real-time service health monitoring, anomaly detection, and actionable alerting; crafted detailed operational bug reports and change management documentation for cross-team collaboration.
- Led **change-control management** and **infrastructure-as-code CI/CD pipelines** via **Jenkins, Git, and code review processes**, ensuring reliable deployments and seamless system functionality across interconnected cloud services supporting EU customers.
- Collaborated with global AWS teams and service-delivery stakeholders on **capacity planning, reliability engineering**, and **post-incident triage**; participated in UAT coordination and documented operational runbooks for European Sovereign Cloud service teams.
- Engineered **data pipelines and ETL workflows** in **Python, SQL (PostgreSQL, MySQL, Oracle)**, and **AWS Lambda** for operational reporting and analytics, enabling data-driven decision-making on service performance, latency, and availability metrics.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux system administration, infrastructure automation.

Automation & Scripting – Python, Bash/Shell scripting, Jenkins CI/CD pipelines, Git version control, change-control workflows.

Operations & Monitoring – Splunk, Dynatrace, CloudWatch, incident management, SLA tracking, on-call rotations, reliability engineering.

Backend & APIs – Java Spring Boot, REST API development, system integrations, PostgreSQL, MySQL, Oracle SQL.

Data Engineering & Analytics – ETL pipelines, data modelling, Power BI dashboards, operational reporting, analytics.

Professional – Agile/Scrum, cross-functional collaboration, technical documentation, UAT support, EU regulatory awareness.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

AWS European Sovereign Cloud Operations Platform (HCL Technologies)

- Built and maintained **operational dashboards** for EC2, S3, Lambda, and Dynamo service health using **CloudWatch metrics, Splunk alerts, and Dynatrace APM**, enabling real-time visibility into availability, latency, and performance for EU-exclusive customer environments.
- Developed **Python automation scripts** and **Lambda functions** to orchestrate incident detection, escalation workflows, and remediation tasks, reducing mean-time-to-resolution (MTTR) by **35%** and improving high-availability SLA compliance.
- Designed and deployed **Jenkins CI/CD pipelines** with **Git branching strategies** for infrastructure changes, configuration updates, and service deployments; conducted change-control reviews and post-implementation triage across interconnected systems.
- Collaborated with global AWS teams on **capacity planning, reliability improvements, and operational runbook documentation** for European Sovereign Cloud service teams; participated in on-call rotations and provided escalation support for production incidents.

Enterprise Service Health & Change-Management Automation (HCL Technologies)

- Engineered **Python ETL pipelines** and **SQL queries** (PostgreSQL, Oracle) to extract operational metrics from interconnected enterprise systems, aggregate reliability telemetry, and produce automated **Power BI dashboards** for operational leadership.
- Implemented **CloudWatch custom metrics** and **Dynatrace synthetic monitoring** to track system dependencies, detect anomalies, and generate actionable bug reports; integrated alerts with **Jenkins workflows** for automated remediation triggers.
- Developed **change-management documentation templates** and **Confluence playbooks** for infrastructure updates; coordinated UAT execution and post-go-live support across multiple operational teams, ensuring seamless system transitions and regulatory compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
