PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **compliance and risk management programmes** across enterprise Java/.NET applications at HCL Technologies, identifying and mitigating business and digital risks through structured **risk assessments** and **regulatory compliance reviews** aligned with **ISO standards** and **GDPR** requirements.
- Supported **operational resilience** and **business continuity planning** for banking and financial services clients by monitoring production systems via **Splunk, CloudWatch, and Dynatrace**, maintaining **SLA compliance**, and coordinating **disaster recovery procedures** for mission-critical payment-operations infrastructure.
- Conducted **data privacy and information security assessments** across interconnected enterprise systems, ensuring adherence to **GDPR, NIS2 EU Directives**, and **ISO 55001 asset-management standards** through comprehensive **audit trail documentation** and regulatory compliance validation in banking environments.
- Prepared **risk registers, compliance reports, and operational governance documentation** leveraging **Power BI dashboards, DAX measures, and Power Query ETL pipelines** to deliver data-driven insights to business stakeholders, regulatory bodies, and project teams on risk exposure and control effectiveness.
- Implemented **governance programmes** including change-control management, **data security frameworks**, and cross-functional **UAT coordination** across enterprise business systems and ERP integrations, supporting post-implementation resilience reviews and operational triage.
- Conducted applied research in **information security, data protection regulations, ISO 20022 message-flow security**, and **digital resilience standards**, synthesizing findings into actionable recommendations for operational risk mitigation across technical and regulatory domains.

SKILLS

Governance, Risk & Compliance – Risk management programmes, Compliance assessments, ISO 55001, ISO 20022, NIS2 EU Directives, GDPR, Data Privacy regulations, Audit trail documentation, Regulatory compliance, Change-control management.

Operational Resilience – Business continuity planning, Disaster recovery procedures, Operational risk assessment, System reliability, SLA management, Incident response protocols, Digital resilience.

Data Security & Information Governance – Data protection frameworks, Information security assessment, Regulatory compliance review, Access controls, Data validation, Schema governance, SEPA/PSD2 payment security.

Business Intelligence & Reporting – Power BI dashboards, DAX measures, Power Query ETL, Tableau, Data modelling, Risk registers, Compliance reporting, Operational dashboards.

Enterprise Systems & Integration – ERP integration support, REST API data flows, PostgreSQL, MySQL, Oracle, System interconnections, Cross-system resilience, Database-level governance.

Technical Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Splunk, Dynatrace, Docker, Linux, Jenkins CI/CD, Git, SQL, Python, Java Spring Boot.

Analytical & Domain Expertise – Problem-solving, Attention to detail, Report writing, Statistical analysis, Hypothesis testing, ISO standards interpretation, SWIFT/payments-operations domain knowledge.

EDUCATION AND TRAINING

PROJECTS

Banking Payments Operations & Compliance Dashboard (HCL Technologies)

- Delivered **SWIFT messaging (MT/MX) transaction-visibility dashboards** and **operational alerting systems** for a banking client, ensuring real-time compliance with payment-processing **SLAs**, **regulatory audit trails**, and **GDPR data-protection controls**.
- Conducted **risk assessments** on cross-border payment flows and **ISO 20022 message structures**, identifying operational vulnerabilities and implementing **business continuity protocols** for instant-payment and SEPA transaction streams.
- Collaborated with banking-domain **business analysts and operations teams** to develop project requirements, execute UAT coordination, and perform post-implementation triage across interconnected systems supporting regulatory compliance and resilience.

Enterprise Governance & Risk Reporting Platform (MSc Data Analytics Capstone & Personal Project)

- Built an end-to-end **AI-powered governance and compliance workflow** using **Claude API (Anthropic)**, **prompt engineering**, and structured **JSON constraint guardrails** to automate **risk assessment report generation** and **compliance documentation** at scale.
- Designed **Power BI dashboards with DAX measures** and **data modelling** to visualize risk registers, control effectiveness, and regulatory compliance status; implemented **GitHub Actions CI/CD pipelines** and **Vercel deployment** for automated report distribution to governance stakeholders.
- Applied statistical analysis, hypothesis testing, and data-warehousing techniques to identify operational resilience patterns and inform evidence-based recommendations for **ISO standards alignment** and **digital risk mitigation strategies**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
