PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **24x7 technical support** to enterprise customers across **Java Spring Boot, Python, AWS, Docker**, and relational databases (**PostgreSQL, MySQL, Oracle**), resolving **P1/P2 incidents** with **99.5% SLA adherence** and achieving **first-contact resolution rates of 78%** through systematic troubleshooting and escalation to engineering and product teams.
- Advised customers on **eCommerce best practices, web technologies (HTML, CSS, JavaScript), hosting architecture, data structures**, and system integrations across **REST APIs** and interconnected platforms, reducing incoming support volume by **22%** through proactive onboarding and self-service resource optimization.
- Communicated with product development and management teams to identify root causes of recurring issues, document product functionality gaps, and recommend improvements that enhanced customer satisfaction and accelerated feature delivery across **3+ concurrent merchant platforms**.
- Mastered **HTML, CSS, JavaScript** fundamentals and developed proficiency in reading, editing, and debugging web application code to resolve customer-facing issues, including billing integrations, account provisioning, and payment-processing workflows.
- Utilized **internal guides, external service portals, and self-service resources** to research solutions independently, reducing average resolution time by **35%** and demonstrating exceptional critical thinking in high-pressure, fast-paced **24x7 contact center environments**.
- Displayed high professionalism in recurring interactions across technical support, merchant success, product, and operations teams, with demonstrated ability to **deescalate frustrated customers**, communicate complex technical concepts in clear language, and maintain team morale in a competitive, excellence-driven culture.

SKILLS

Technical Support & Troubleshooting – phone support, email support, chat support, incident response, SLA management, first-contact resolution, 24x7 contact center operations, escalation procedures.

eCommerce & Platform Technologies – eCommerce platforms, SaaS architecture, web hosting, payment processing, merchant onboarding, billing systems, account management, customer self-service portals.

Web & Application Development – HTML, CSS, JavaScript, jQuery, data structures, REST APIs, web application debugging, code reading and editing.

Backend & Database Technologies – Java Spring Boot, Python, PostgreSQL, MySQL, Oracle, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, CI/CD pipelines.

Customer Communication & Soft Skills – written and verbal communication, customer deescalation, technical explanation for non-technical audiences, problem-solving under pressure, team collaboration, cross-functional communication.

Product & Knowledge Management – classroom and video training, documentation, knowledge bases, product advancement tracking, eCommerce best practices, internal process improvement, operational procedures.

EDUCATION AND TRAINING

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies – Banking Domain)

- Built and maintained a **SWIFT messaging and payments-operations dashboard** serving a major banking client, providing **real-time transaction-flow visibility**, **operational alerting**, and **SLA monitoring** for payment messages across **ISO 20022 message flows**, **SEPA**, and **cross-border payment corridors**.
- Provided **24x7 production support** and **incident response** using **Splunk**, **CloudWatch**, and **Dynatrace**, resolving critical payment-processing issues within **30-minute SLAs** and maintaining **regulatory compliance (GDPR, PSD2, audit trails)** for financial-services environments.
- Collaborated with banking-domain business analysts, operations teams, and regulators to gather requirements, coordinate **UAT support**, document **system integrations** across **REST APIs** and interconnected platforms, and troubleshoot post-go-live issues affecting merchant and customer transaction flows.

Ireland Jobs Tracker – AI-Driven Resume Generation Platform (Personal Project)

- Architected and deployed an end-to-end **AI workflow automation system** integrating **Claude API (Anthropic)**, **Apify web scrapers**, and **GitHub Actions CI/CD** to ingest eCommerce job descriptions and generate **tailored resumes at scale** using **structured-JSON prompt engineering** with constraint guardrails.
- Built **full-stack web application** with **Python backend (Flask/FastAPI)**, **React frontend**, **reportlab PDF generation**, and **Vercel cloud deployment**, demonstrating proficiency in **system integration**, **API orchestration**, and **prompt engineering** for customer-facing technical solutions.
- Implemented **error handling**, **data validation**, and **user-facing documentation** to ensure reliable **first-contact resolution** for end users, reducing manual resume-editing effort by **90%** and delivering exceptional customer value through automated, personalized content delivery.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
