PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed **standard extracts requests** (Spos 4x, Standard Trade, Taxlot equivalents) for enterprise fund administration clients; investigated and resolved **file generation and data issues** with **SQL** queries across **PostgreSQL, MySQL, Oracle** databases, achieving **98% first-contact resolution rate** on data validation errors.
- Configured and maintained **electronic interfaces** for outbound data exchange from enterprise applications using **REST APIs** and ETL workflows; implemented **Python scripting** for automated data pipeline orchestration, reducing manual extract processing time by **40%**.
- Provided **level one support and troubleshooting** for outbound reconciliations, instructs, SWIFT, and payments data flows; diagnosed configuration errors across interconnected systems and escalated complex issues with root-cause analysis and detailed documentation.
- Demonstrated ability to **multi-task on multiple items** based on functional priorities; managed concurrent client on-boarding requests, interface configuration changes, and ad-hoc reporting queries in **Jira** ticketing system with strict SLA adherence and cross-functional communication.
- Built comprehensive **operational dashboards and monitoring systems** using **Power BI** and **Splunk** to track outbound data extracts, file delivery success rates, and reconciliation status; enabled business teams and clients to self-serve on interface performance and data quality metrics.
- Applied strong technical understanding of **complex financial instruments**, fund portfolio data structures, and hedge fund administration workflows; collaborated with operations teams, business analysts, and clients to gather requirements, support UAT, and ensure effective communication on configuration changes and data interface enhancements.

SKILLS

Data Operations & Reporting – standard extracts, outbound data interfaces, data reconciliation, SWIFT messaging, payments data flows, file generation, data validation, client on-boarding.

Databases & SQL – PostgreSQL, MySQL, Oracle, ad-hoc queries, schema analysis, data integrity checks, ETL data flows.

Programming & Automation – Python, SQL scripting, scheduled reporting, data pipeline automation, REST API integrations.

Business Intelligence & Dashboards – Power BI, Splunk, operational reporting, DAX measures, data modelling, stakeholder-facing dashboards.

Financial Domain Knowledge – fund administration, hedge fund operations, portfolio data structures, reconciliation workflows, SWIFT MT/MX message formats, ISO 20022, cross-border payments.

Operations & Process Management – change-control management, configuration management, UAT support, incident response, Jira, Confluence, Agile workflows, SLA management.

Technical & Cloud Infrastructure – AWS (EC2, S3, Lambda), Docker, Linux, Git, Jenkins, CI/CD pipelines.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments & Operations Dashboard (HCL Technologies – Banking & Financial Services)

- Designed and maintained production **outbound reporting dashboard** for SWIFT messaging and payments-operations data extraction to banking client; enabled real-time visibility into **transaction-flow data**, settlement status, and operational alerting for payment message delivery.
- Implemented **data extraction and file generation workflows** from enterprise banking systems; configured **electronic interfaces** to deliver reconciliation data and SWIFT instructs to client systems, ensuring **regulatory compliance** with audit trails and **GDPR / Data Protection** requirements.
- Provided **level one support and troubleshooting** for outbound data extract issues; investigated **file generation errors** and configuration discrepancies across **interconnected ERP and operational systems**; collaborated with banking-domain BAs and operations teams on requirements and post-implementation triage.

Enterprise Fund Administration Data Integration Platform (HCL Technologies – ERP & Business Systems)

- Supported **configuration and maintenance of electronic data interfaces** across enterprise business systems serving hedge fund administration clients; orchestrated **outbound extracts** (portfolio data, trade reconciliation, position files) from fund administration systems to client and vendor endpoints.
- Developed **Python ETL scripts** to automate **standard extracts requests** and data pipeline processing; reduced manual intervention by **35%** through scheduled automation of recurring reconciliation file generation and delivery workflows.
- Managed **change-control and client on-boarding** for new data interfaces; performed UAT coordination and post-go-live support; provided **technical communication** to internal operations teams and clients on file format specifications, delivery schedules, and data quality metrics.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
