PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Supported Supplier Quality Engineering activities including **Change Orders, NCEs, NCMRs, SCAR, and CAPA investigations** across interconnected enterprise systems at HCL Technologies, assessing and disposing of nonconforming materials with cross-functional manufacturing and quality teams.
- Collected manufacturing and inspection data, performed quality assessments, and supported investigations led by senior engineers; maintained **100% compliance** with internal quality systems and external regulations (**GMP, GLP, ISO standards**) to enable safe, regulated product distribution.
- Provided day-to-day quality support on production environments, assisting manufacturing and inspection teams with methods, process specifications, and quality issues; achieved **95% first-pass resolution** on floor-level quality concerns through systematic troubleshooting and root-cause analysis.
- Maintained and updated quality procedures, protocols, and inspection methods; performed routine **line audits** to verify systems operated as intended; documented audit findings and corrective actions in **Oracle and Agile** database systems with **zero compliance gaps**.
- Identified and contributed to quality and process improvement initiatives using **Six Sigma methodologies**; supported corrective action implementation and communicated quality, safety, health, and environmental concerns to senior management and regulatory stakeholders.
- Demonstrated strong documentation practices and attention to detail; interpreted technical drawings and specifications, used inspection tools and **Microsoft Office** proficiently, and supported training of junior staff on quality protocols and GMP-compliant procedures in a regulated manufacturing environment.

SKILLS

Quality Systems & Regulations – GMP (Good Manufacturing Practice), GLP (Good Laboratory Practice), ISO standards, Six Sigma, CAPA (Corrective and Preventive Action), SCAR (Supplier Corrective Action Request), NCM (Nonconforming Material), change management, compliance auditing.

Medical Device & Regulated Manufacturing – nonconforming material assessment and disposition, supplier quality engineering, quality investigations, line audits, inspection protocols, process specifications, regulatory compliance documentation.

Quality Systems & Data Management – Oracle database systems, Agile, Microsoft Office (Excel, Word, Access), quality procedure documentation, inspection data collection, audit trails, cross-functional quality reporting.

Manufacturing & Process Support – production floor quality support, inspection methodologies, process improvement, quality metrics tracking, root-cause analysis, corrective action support, manufacturing change orders.

Cross-Functional Collaboration – interfacing with external suppliers, internal manufacturing teams, engineering, regulatory, materials, and operations personnel; UAT support, requirements gathering, post-implementation triage.

EDUCATION AND TRAINING

PROJECTS

SWIFT Messaging & Payments Operations Quality Dashboard (HCL Technologies)

- Supported quality and operational excellence on a **SWIFT messaging** and **payments-operations dashboard** serving a regulated banking client; assisted in assessing nonconforming transaction flows and ensuring **100% compliance** with payment-processing SLAs and regulatory audit trails.
- Collaborated with banking domain business analysts, operations teams, and regulatory stakeholders to gather quality requirements, support UAT cycles, and implement post-go-live corrective actions; documented quality procedures and training materials for compliance with **GDPR and data-protection regulations**.
- Applied knowledge of **SWIFT message formats (MT/MX)**, **ISO 20022 message structures**, **SEPA payment flows**, and **cross-border payment processing** to identify quality gaps and support supplier and process improvement initiatives in a highly regulated financial-services environment.

Enterprise Business Systems Quality Integration & Change Management (HCL Technologies)

- Supported quality compliance and change-control management for **ERP modules and operational platform integrations** across interconnected enterprise business systems; assisted in assessing system changes, verifying specification compliance, and documenting quality procedures for system updates.
- Performed quality audits and inspections on **REST API integrations and database-level data flows** across **PostgreSQL, Oracle, and MySQL** systems; identified nonconformances, supported root-cause analysis, and contributed to corrective action implementation to ensure data integrity and regulatory compliance.
- Coordinated with manufacturing, engineering, materials, and operations teams during UAT cycles and post-implementation support; demonstrated proficiency in **Microsoft Office, Oracle, and Agile** systems for quality documentation, audit reporting, and change-order tracking.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
