PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, deployed, and maintained enterprise-grade network infrastructure across **HPE Aruba** switching platforms, **Fortinet FortiGate** firewalls, and wireless access points; ensured **99.8% network uptime** and continuous service delivery across customer environments.
- Led root-cause analysis (RCA) and remediation of **P1/P2 network incidents** affecting enterprise clients; escalated complex troubleshooting from helpdesk teams, implemented long-term resolution strategies, and produced detailed incident reports for internal and external stakeholders covering network health and performance trends.
- Executed planned firmware upgrades, scheduled maintenance windows, and infrastructure refresh activities across **Aruba ClearPass NAC/AAA** platforms; managed change-control processes, coordinated UAT validation, and maintained best-practice lifecycle management for customer network equipment.
- Configured and optimized **Fortinet FortiGate**, **Palo Alto**, and **Aruba** network security controls; implemented network segmentation, capacity planning, and scalability design across wired and wireless infrastructure; provided expert technical guidance on network strategy and security architecture.
- Monitored and analyzed network performance using **enterprise monitoring tools** including **CloudWatch** and **Dynatrace**; produced operational dashboards and performance reports; collaborated with VoIP, Managed Services, and Cybersecurity teams on cross-functional integrated solutions and pre-sales technical input.
- Mentored junior network engineers through technical knowledge-sharing, contributed to internal standards development and process improvement initiatives, and supported after-hours critical infrastructure roster for customer-impacting events and major project deployments.

SKILLS

Enterprise Networking – HPE Aruba switching platforms, Aruba wireless solutions, Fortinet FortiGate firewalls, Palo Alto firewalls, Aruba ClearPass NAC/AAA.

Network Troubleshooting & Diagnostics – wired and wireless network diagnostics, NAC principles, AAA frameworks, network monitoring tools, root-cause analysis, performance optimization.

Network Design & Architecture – enterprise network design, network segmentation, capacity planning, scalability design, security controls, best-practice configuration, firmware lifecycle management.

Operations & Change Management – scheduled maintenance, infrastructure upgrades, change-control coordination, UAT support, post-implementation support, SLA management, incident response.

Infrastructure & Cloud – AWS EC2, S3, Lambda, CloudWatch, Docker containerization, Linux administration, CI/CD pipelines, Jenkins, Git.

Data & Reporting – Power BI dashboards, network health reporting, performance trend analysis, technical documentation, Confluence documentation management.

Business & Collaboration – cross-functional team leadership, customer service orientation, technical communication, sales support, pre-sales solution design, stakeholder engagement.

EDUCATION AND TRAINING

PROJECTS

Enterprise Banking Network Infrastructure & Monitoring (HCL Technologies)

- Designed and deployed enterprise-grade network monitoring and incident management infrastructure supporting a production banking payments-operations dashboard; integrated **Dynatrace** and **CloudWatch** for real-time network health visibility and operational alerting.
- Configured **NAC/AAA authentication** controls and network segmentation policies to enforce regulatory compliance (GDPR, audit trails) across banking infrastructure; ensured secure access to payment-processing systems and sensitive financial data.
- Executed scheduled maintenance windows and firmware upgrades across enterprise switching and wireless platforms; coordinated UAT validation with banking operations teams and maintained change-control documentation for regulatory audit compliance.

Network Infrastructure & Change Management for ERP Systems Integration (HCL Technologies)

- Supported network infrastructure provisioning and optimization for interconnected enterprise business systems including ERP platforms; configured **network segmentation** and **firewall rules** to facilitate secure **REST API integrations** across PostgreSQL, Oracle, and MySQL data flows.
- Managed change-control processes for system configuration updates and infrastructure refresh activities; coordinated cross-functional UAT testing and post-go-live support with business system teams, helpdesk, and customer operations staff.
- Produced technical documentation covering network topology, security policies, and incident resolution procedures; provided technical knowledge transfer and mentoring to junior support engineers on enterprise networking best practices and troubleshooting methodologies.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
