PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and operated **high-scale backend applications** using **Java Spring Boot** and **Python**, delivering REST APIs and microservices across development, staging, and production environments with focus on **operational excellence, security, and scalability**.
- Applied modern software development practices including **CI/CD pipelines (Jenkins)**, **infrastructure-as-code**, **containerization (Docker)**, and **serverless computing (AWS Lambda)** to automate deployment and reduce time-to-market by **40%**.
- Diagnosed and resolved **performance issues** in production systems using **Splunk, CloudWatch, and Dynatrace**; performed root-cause analysis and implemented monitoring strategies to maintain **99.5% SLA** across mission-critical applications.
- Participated in **agile software development practices (Scrum)** including sprint planning, estimation, code reviews, and retrospectives; led sprint deliverables of medium complexity and collaborated across teams to integrate systems with **Data Fabric and internal toolsets**.
- Performed **general application development activities** including **unit testing (JUnit)**, **software testing and quality engineering**, code deployment to development environments, and technical documentation enabling other developers to contribute to unfamiliar code with minimal onboarding effort.
- Triaged product and system issues by analyzing sources of failure and impact on network and service operations; debugged and troubleshooted code across **mainstream open-source technologies** and integrated multiple internal systems via **REST APIs** and relational databases.

SKILLS

Backend & Full-Stack Development – Java, Spring Boot, Python, REST APIs, microservices architecture, serverless computing, application development, system integration.

Frontend & Web Development – HTML, CSS, JavaScript, Angular, Bootstrap, UI development, web development.

Build & Deployment Tools – Maven, Gradle, Jenkins, Git, GitHub, CI/CD pipelines, infrastructure-as-code, Docker, containerization.

Cloud Technologies – AWS (EC2, S3, Lambda, CloudWatch), cloud platform architecture, scalability.

Databases & Data Management – SQL, PostgreSQL, MySQL, SQL Server, relational databases, schema design, data modeling.

Testing & Quality Engineering – JUnit, software testing, performance testing, quality assurance strategies, automated testing.

Development Practices & Tools – Agile, Scrum, XP, JIRA, Confluence, GitHub, source code control management, modern JDK (v1.7+), Linux.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies)

- Designed and developed a **high-scale backend application** supporting a major banking client's payment messaging and transaction-flow visibility system, integrating **REST APIs** with core banking systems and **SQL databases (PostgreSQL, Oracle)**.
- Implemented **microservices architecture** using **Java Spring Boot** and **Python** to process and monitor payment message flows, achieving **sub-second latency** for transaction reconciliation and regulatory reporting.
- Built **operational dashboards and monitoring** using **Splunk and CloudWatch** with custom alerts for payment processing anomalies; performed continuous **performance testing and quality engineering** to maintain **99.5% SLA** in a heavily regulated financial environment.
- Applied **CI/CD practices (Jenkins, Git)** and **infrastructure-as-code** for automated deployment and environment promotion; conducted **code reviews** and documentation to enable team knowledge transfer across unfamiliar payment-processing code.

Ireland Jobs Tracker – AI-Powered Resume & JD Matching Platform (Personal Project)

- Architected and deployed a full-stack application integrating **Python backend (FastAPI)**, **JavaScript/React frontend (HTML, CSS, Bootstrap)**, and **AI workflow orchestration** to automate job description ingestion and resume generation at scale.
- Implemented **serverless computing** with **GitHub Actions CI/CD pipelines** and deployed to **Vercel**; engineered a robust data pipeline combining web scrapers, **REST API integrations**, and structured JSON processing for reliable automation.
- Developed advanced **prompt engineering** and AI model orchestration using Claude API (Anthropic), delivering tailored resume content generation with constraint guardrails and JSON validation; demonstrated hands-on **software development practices** including version control, automated deployment, and documentation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
