PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Responded to customer support cases in line with Service Level Agreements, managing **P1/P2 incident severity classification** and delivering **world-class support experience** to enterprise customers through **Splunk, CloudWatch, and Dynatrace** production monitoring across Java/.NET applications; achieved **95%+ SLA compliance** through rapid troubleshooting and root-cause analysis.
- Proactively identified and resolved potential problems by gathering logs, configuration details, and reproducing reported issues; researched solutions in Knowledge Base and technical documentation, recommending fixes and escalating complex cases with full transparency and accountability to internal teams for speedy resolution.
- Ensured Forcepoint-equivalent products performed at optimal levels by addressing underlying and additional problems uncovered during customer engagement; approached each case with **extreme accountability** and **results-driven execution**, demonstrating sense of urgency across all severity levels.
- Documented all interactions and case details within customer tracking databases with detailed descriptions of issues and resolutions; created and maintained **comprehensive Knowledge Base documentation** and trained **5+ Technical Support Engineers** through formal mentoring programs and in-depth training on product components and integrations.
- Acted as subject matter expert and technical advisor for enterprise business systems integrations, including **ERP change-control management, system configuration updates**, and cross-functional collaboration with business stakeholders; provided technical reviews of user documentation, product requirements documents, and functional specifications across interconnected platforms.
- Participated in active knowledge sharing via technical discussions and product supportability programs; delivered in-depth training in areas of expertise covering general product knowledge, **REST API integrations**, and enterprise system interconnectivity, ensuring **maximum customer value** and adoption of security and data-protection capabilities.

SKILLS

Customer Support & Incident Management – SLA management, P1/P2 incident response, case prioritization, escalation procedures, customer tracking systems.

Production Monitoring & Observability – Splunk, CloudWatch, Dynatrace, log analysis, performance troubleshooting, operational alerting.

Enterprise Systems & Integration – ERP support, REST API integrations, change-control management, UAT coordination, cross-system data flows, system configuration.

Technical Documentation & Knowledge Management – Knowledge Base development, user documentation, training materials, functional specifications review, mentoring programs.

Programming & Scripting – Python, Java, SQL, Shell scripting, REST API development, troubleshooting automation.

Databases & Data Management – PostgreSQL, MySQL, Oracle, ad-hoc query analysis, data validation, schema troubleshooting.

DevOps & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, CI/CD pipelines.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Payments Operations Support Platform (HCL Technologies)

- Provided world-class technical support and production monitoring for a **SWIFT messaging / payments-operations dashboard** serving a global banking client; managed **transaction-flow visibility**, operational alerting, and SLA-critical incident response across payment message processing systems.
- Gathered logs, configuration details, and reproduced issues related to **SWIFT MT/MX message formats, ISO 20022 message flows**, and **SEPA / cross-border payment processing**; researched solutions in technical documentation and escalated complex cases with full accountability, ensuring minimal disruption to payment operations.
- Documented all customer interactions and case resolutions within tracking systems; acted as subject matter expert on **payments processing integrations, PSD2 / Open Banking requirements**, and **GDPR / regulatory compliance** across interconnected enterprise systems; trained support engineers on financial-domain troubleshooting and audit-trail verification.

Ireland Jobs Tracker – AI-Powered Resume Generation Platform (Personal Project)

- Architected and deployed an end-to-end **AI workflow automation platform** integrating **Claude API (Anthropic)**, job-description scraping via Apify, and intelligent content generation; engineered **structured JSON prompt engineering** with constraint guardrails to generate JD-tailored resumes at scale using **claude-3.5-haiku**.
- Orchestrated complete technical pipeline from **JD ingestion** → **Claude API integration** → **reportlab PDF generation** → **GitHub Actions CI/CD** → **Vercel deployment**; implemented robust error handling, API rate-limiting, and document validation to ensure reliable, production-grade delivery of **customized resume outputs**.
- Demonstrated expertise in **prompt engineering, API integration, CI/CD automation**, and **full-stack web deployment**; provided technical documentation and knowledge sharing on AI workflow orchestration techniques applicable to enterprise system integrations and customer-facing automation solutions.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
