## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Conducted **Enhanced Due Diligence (EDD)** investigations on high-risk fundraisers and account holders within the payments operations environment at HCL, applying **financial crime risk assessment** frameworks to identify fraud, AML/CFT concerns, sanctions exposure, and politically exposed persons (PEPs); documented findings comprehensively in case management systems to support **defensible decision-making** and regulatory audit requirements.
- Analyzed **complex transactional activity and fundraiser patterns** using **SQL queries** across PostgreSQL and Oracle databases to detect unusual behavior, assess financial crime typologies, and determine appropriate escalation steps; validated data integrity and reconciliation workflows across **cross-border payments** and **SEPA instant payment** flows.
- Gathered and synthesized **open-source intelligence** and **third-party data sources** to support risk assessments on organizational structures, ownership, and operational legitimacy; evaluated **PSD2 / Open Banking** account activity and **ISO 20022 message flows** to identify emerging financial crime threats and platform abuse patterns.
- Collaborated cross-functionally with **Payments Risk, Compliance, Legal, and Payment Service Providers** teams to investigate complex EDD cases and mitigate platform abuse; served as an escalation point providing **subject matter expertise** and **risk guidance** to internal stakeholders on payments-specific, regulatory, and sanctions-related matters.
- Developed and maintained **subject matter expertise in platform-specific risks, global AML/CFT frameworks, sanctions screening** requirements, and evolving **financial crime typologies**; stayed current with regulatory guidance, industry standards, and emerging threats through continuous analysis of **adverse media, regulatory filings, and financial crime indicators**.
- Provided **technical guidance and quality feedback** to junior analysts on investigative consistency, case documentation standards, and adherence to EDD frameworks; drove process improvements that strengthened effectiveness and scalability of EDD program through automation of **data validation scripts** in **Python** and **SQL**.

## SKILLS

**Financial Crime & Compliance** – Enhanced Due Diligence (EDD), AML/CFT frameworks, sanctions screening, financial crime risk assessment, fraud investigation, PEP (politically exposed person) identification, adverse media analysis, regulatory audit support.

**Payments & Risk Domain** – Payments operations, cross-border payments, SEPA instant payments, ISO 20022 message flows, PSD2 / Open Banking, SWIFT messaging (MT/MX), transactional risk assessment, account activity analysis, tokenization concepts.

**Data Analysis & Investigation** – SQL (PostgreSQL, Oracle, MySQL), open-source intelligence, third-party data sourcing, pattern recognition, organizational structure analysis, transaction flow visibility, case management systems, data validation, reconciliation workflows.

**Case Management & Documentation** – Comprehensive investigative findings documentation, defensible decision-making support, regulatory compliance reporting, audit trail maintenance, case escalation procedures, written communication, stakeholder risk guidance.

**Technical Tools & Systems** – Python scripting, SQL database queries, Jenkins CI/CD pipelines, Git version control, Jira ticketing, Confluence documentation, CloudWatch monitoring, Linux system administration.

**Regulatory & Industry Knowledge** – Global EDD frameworks, GDPR / Data Protection compliance, financial services regulatory requirements, industry guidance, emerging threat landscape, best practices in financial crime prevention.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India**

01/2021

## PROJECTS

### **SWIFT Payments Operations & EDD Dashboard (HCL Technologies)**

- Designed and maintained a production **payments operations dashboard** supporting enhanced due diligence reviews on **SWIFT messaging (MT/MX)**, **cross-border payments**, and **SEPA instant payment** flows for a Tier-1 banking client; integrated **ISO 20022 message structure** analysis and **transaction-flow visibility** to surface high-risk activity patterns.
- Conducted investigative reviews on complex fundraiser and organizational accounts using **financial crime risk assessment frameworks**; analyzed **transactional patterns**, **account history**, and **adverse media** to identify fraud, AML/CFT concerns, sanctions exposure, and PEP matches; escalated **high-risk cases** to Compliance and Legal with comprehensive, audit-defensible documentation.
- Collaborated with banking-domain business analysts, operations teams, and regulatory stakeholders to gather requirements, refine EDD criteria, and ensure **GDPR and financial services regulatory compliance** (including SEPA requirements); performed UAT support and post-implementation triage to validate investigation accuracy and operational reliability.

### **Risk Analytics & Case Management Automation (HCL Technologies)**

- Built **Python ETL scripts** and **SQL stored procedures** to automate data ingestion from multiple source systems (payment gateways, transaction databases, third-party risk feeds) into a centralized **case management system**; reduced manual data validation effort by **40%** and improved investigation turnaround time.
- Developed **Power BI dashboards** and **DAX measures** to visualize financial crime indicators, transaction risk profiles, and escalation trends across fundraisers and accounts; created executive-facing compliance reporting on EDD case volumes, investigation outcomes, and emerging threats.
- Implemented **Jenkins CI/CD pipelines** and **GitHub Actions workflows** to automate generation of audit reports and investigation summaries; ensured **defensible decision-making** through consistent, traceable documentation and data lineage across all EDD investigations and case escalations.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
