PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Diagnosed and troubleshooted production blockers across **enterprise Java/Spring Boot applications** and **backend systems** using **Splunk, CloudWatch, and Dynatrace**, achieving **99.5% uptime SLA** through swift root-cause analysis and cross-functional collaboration with Engineering and Operations stakeholders.
- Designed and iterated on **automated frameworks and internal tools** using **Python scripting, shell scripts, and REST APIs** to streamline issue management life-cycle, enabling autonomous resolution of data pipeline blockers and reducing incident resolution time by **40%**.
- Created standardized **technical playbooks and operational processes** for server troubleshooting and system health monitoring, empowering Operations teams to manage and resolve workflow execution blockers autonomously across interconnected **enterprise business systems** and **ERP platforms**.
- Managed full life-cycle technical projects including **design, development, maintenance, and long-term improvements** of **backend Java microservices** and **data pipeline automation**, delivering **15+ feature releases and critical hotfixes** in production while maintaining change-control governance and UAT coordination.
- Troubleshooted system integration issues across **PostgreSQL, MySQL, and Oracle databases** with **ad-hoc SQL queries and schema validation**, resolving supply-chain software stack dependencies and data flow blockers impacting capacity fulfillment operations.
- Partnered with stakeholders across Banking Operations, Business Analysis, and Server Operations to investigate negative business outcomes, identify root causes in **payments processing workflows, SWIFT messaging systems, and ISO 20022 message flows**, and drive operational efficiency improvements and cost-savings.

SKILLS

Backend Development & Systems – Java, Spring Boot, Python, Shell scripting, REST APIs, backend application development.

Data & Big Data Technologies – Python data stack (pandas, NumPy, scikit-learn), SQL (PostgreSQL, MySQL, Oracle), data pipeline development, ETL, Hadoop, Spark.

Cloud Computing & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD (Jenkins pipelines, Git), Linux system administration.

Monitoring, Observability & Operational Excellence – Splunk, Dynatrace, CloudWatch, performance metrics, SLA management, incident response, P1/P2 troubleshooting.

Enterprise Systems & Integration – ERP integration, business systems support, change-control management, cross-system data flows, payments processing, SWIFT MT/MX messaging, ISO 20022 message flows, SEPA standards.

Data Analytics & Business Intelligence – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing, business reporting.

AI & Automation Engineering – Claude API, Anthropic SDK, prompt engineering, AI workflow orchestration, GitHub Actions.

EDUCATION AND TRAINING

PROJECTS

Data Center Operational Excellence & Issue Management Platform (HCL Technologies, Banking & Enterprise Operations)

- Architected and deployed **Python-based backend automation framework** integrated with **REST APIs** to diagnose and troubleshoot data center workflow execution blockers and system integration failures across interconnected **enterprise business systems, ERP modules, and operational platforms**.
- Designed **standardized technical playbooks and monitoring dashboards** using **Splunk and Dynatrace** that enabled global Operations teams to autonomously resolve capacity fulfillment blockers, reducing average incident resolution time by **45%** and improving operational efficiency by **30%**.
- Implemented **automated data pipeline and ETL workflows** using **Python, shell scripts, and cron jobs** to aggregate health metrics, system logs, and supply-chain software stack performance data, driving continuous improvement and cost-savings across Google Cloud infrastructure operations.

Enterprise Payments & Systems Integration Troubleshooting (HCL Technologies, Banking Operations)

- Troubleshot and resolved mission-critical blockers in **SWIFT messaging systems (MT/MX formats) and ISO 20022 message flows** supporting high service-level objectives and service-level agreement requirements, collaborating with Banking Operations, Business Analysts, and regulatory stakeholders to identify and fix root causes.
- Engineered **SQL-based data validation and reconciliation queries** across **PostgreSQL, MySQL, and Oracle databases** to diagnose cross-border payment processing failures, SEPA payment blockers, and system integration issues impacting transaction flow visibility and operational auditing.
- Developed **Python automation scripts and REST API integrations** to streamline issue management life-cycle across interconnected ERP platforms and payments operations systems, enabling autonomous troubleshooting of workflow execution blockers and reducing manual triage overhead by **35%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
