PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Troubleshoot and resolved **P1/P2 production incidents** across enterprise Java/Spring Boot and .NET applications serving large-scale customers with **99.9% SLA requirements**, leveraging **Splunk, Dynatrace, and CloudWatch** for root-cause analysis and performance debugging in multi-node containerized environments.
- Debugged and diagnosed **application, operational, and infrastructure issues** for banking customers operating **containerized workloads on AWS (EC2, Lambda, S3)** and **Docker**-based deployments; performed **kernel-level performance analysis** and system administration tasks to optimize availability and scale across interconnected systems.
- Advocated for customer needs by triaging technical obstacles in **payment processing systems, SEPA workflows, and cross-border payment operations** with **high service-level agreement requirements**; collaborated cross-functionally with product teams, engineering, and customer organizations to drive product improvements and resolve deployment blockers.
- Developed **Python scripting and automation tools** for system troubleshooting, data pipeline diagnostics, and operational monitoring; built **ETL workflows and scheduled reporting** to accelerate issue identification and faster diagnosis across enterprise infrastructure.
- Administered and optimized **Linux systems, shell scripting, networking (TCP/IP fundamentals), and web technologies (HTTP, DNS, routing)** for production support environments; performed **SQL query optimization and database-level debugging** across PostgreSQL, MySQL, and Oracle to resolve application performance issues.
- Supported enterprise customers through UAT coordination, change-control management, and post-go-live system administration for large-scale business-critical deployments; documented troubleshooting procedures and built internal knowledge bases to accelerate team support and reduce mean-time-to-resolution.

SKILLS

Kubernetes & Container Orchestration – Docker, containerized workload debugging, multi-node environment troubleshooting, system administration.

Cloud Infrastructure – AWS (EC2, Lambda, S3, CloudWatch), production deployment support, workload scaling and performance optimization.

Systems Administration & Networking – Linux, TCP/IP, routing, load balancing, DNS, HTTP, web technologies, kernel debugging, performance analysis.

Backend & DevOps – Java Spring Boot, REST APIs, Python scripting, CI/CD (Jenkins, Git), troubleshooting and incident response.

Database & Data Engineering – PostgreSQL, MySQL, Oracle, SQL query optimization, schema diagnostics, data pipeline debugging.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, operational dashboards, SLA management, alerting.

Domain Expertise – Enterprise applications, payment processing systems, SEPA and cross-border payments, ISO 20022 message flows, high-SLA customer support.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Production Support & Incident Response – Banking Payments Dashboard (HCL Technologies)

- Owned **level-two technical support** for a mission-critical **SWIFT messaging and payment-operations dashboard** serving a large banking customer with **24/7 availability and stringent SLA requirements**; diagnosed and resolved **application, infrastructure, and operational issues** across production environments.
- Performed **root-cause analysis** on payment-flow disruptions, transaction-visibility gaps, and system performance degradation using **Splunk, Dynatrace, and CloudWatch**; built diagnostic tools in **Python** to accelerate faster diagnosis and reduce incident resolution time by **40%**.
- Advocated for customer requirements in post-incident reviews and product feedback sessions; collaborated with product engineering and banking-domain stakeholders to implement improvements to reliability, logging, and operational alerting for **SWIFT MT/MX message processing** and **ISO 20022 payment flows**.

Enterprise System Integration & Change Management – Multi-System Banking Operations (HCL Technologies)

- Managed **change-control and deployment processes** for interconnected enterprise systems (ERP modules, operational platforms, business-critical applications) supporting large banking customers; coordinated **UAT, post-go-live troubleshooting, and system administration** across **PostgreSQL, Oracle, MySQL** databases and **REST API integrations**.
- Debugged **cross-system data flows and integration failures** between business-critical applications; developed **SQL optimization queries and troubleshooting automation scripts** in **Python** to diagnose synchronization issues and resolve data consistency problems.
- Documented operational procedures, built training materials for customer support teams, and established knowledge bases for troubleshooting common deployment obstacles; improved customer onboarding and support efficiency for high-SLA enterprise deployments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
