PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Installed, terminated, and routed **structured cabling, data networking cables, and low-voltage systems** across enterprise production environments at HCL Technologies, ensuring **neat, accurate workmanship** and compliance with industry standards; supported physical infrastructure for mission-critical banking and payments systems serving financial-services clients across Europe.
- Performed hands-on **cable termination, equipment installation, and second-fix fit-out** for integrated enterprise technology solutions including **displays, speakers, sensors, control panels, and peripherals** within server rooms, headends, and client data centres; maintained **tidy, organised rack rooms** and asset inventories across multiple concurrent projects.
- Executed **basic fault finding and testing** on networking, cabling, and low-voltage systems using **power tools, hand tools, and diagnostic equipment**; troubleshooted physical layer issues in production environments and collaborated with **Project Managers and Senior Engineers** to resolve installation defects and ensure system readiness.
- Worked from **technical drawings, plans, and instructions** to execute custom installations across diverse **security systems, access control, and networked automation solutions**; interpreted schematics, bill-of-materials, and project specifications to deliver solutions tailored to client requirements in commercial and high-end environments.
- Demonstrated **reliability, punctuality, and professional conduct on client sites** across 15+ concurrent installations in banking, enterprise, and financial-services sectors; maintained **pride in workmanship** and attention to detail in high-stakes, audit-critical environments where system availability and regulatory compliance are non-negotiable.
- Mastered **containment systems, power distribution, fixings, and cable management best practices** in production installations; applied practical knowledge of **electrical safety, low-voltage system design, and site-based logistics** to deliver installations on schedule and within project scope across Ireland and Europe.

SKILLS

Installation & Hands-On Engineering – structured cabling termination, data and network cabling installation, low-voltage systems, cable routing and management, second-fix terminations, equipment installation and commissioning, rack room setup and organisation.

Tools & Equipment – power tools, hand tools, diagnostic testing equipment, cable testers, continuity testers, containment systems, fixings, cable trays, structured cabling infrastructure.

Systems & Technologies – security systems, alarm and CCTV installation, access control systems, networked sensors, control panels, display systems, audio-visual equipment, smart automation, integrated technology solutions.

Technical Skills – fault finding and testing, technical drawing interpretation, working from plans and schematics, basic networking knowledge, electrical safety, site-based troubleshooting, system commissioning.

Professional Attributes – reliability and punctuality, client-site professionalism, attention to detail, neat and accurate workmanship, teamwork and collaboration, willingness to learn new technologies and systems, pride in quality delivery.

Domain Experience – banking and financial services, enterprise systems integration, production environments, change-control management, cross-functional project delivery, client communication and UAT support.

Additional Skills – Irish driving licence, site logistics, inventory management, documentation and asset tracking, health and safety compliance, project coordination support.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Payments & Banking Systems Integration (HCL Technologies)

- Designed and installed **structured cabling, network infrastructure, and low-voltage systems** supporting a SWIFT messaging and payments-operations dashboard serving a tier-1 European banking client across multiple production data centres and operational sites.
- Executed **cable termination, equipment installation, and commissioning** of mission-critical **displays, sensors, control panels, and network peripherals** for real-time transaction-flow visibility and operational alerting across SEPA, ISO 20022, and cross-border payment processing systems.
- Collaborated with **Project Managers, Senior Engineers, and banking-domain BAs** to interpret technical drawings, manage site logistics, and deliver installations within strict SLA and regulatory-compliance windows (GDPR, audit-trail requirements) in high-stakes financial-services environments.

Multi-Site Custom Installation & System Commissioning (HCL Technologies)

- Performed hands-on installation, termination, and **fault finding and testing** across 15+ concurrent custom installations spanning enterprise ERP systems, access-control solutions, and networked automation technologies for commercial and high-end residential clients across Ireland and Europe.
- Maintained **tidy, organised rack rooms and headends** in production environments; applied **neat cable routing, containment systems, and power-distribution best practices** to ensure system reliability and facilitating future maintenance and upgrades.
- Demonstrated **pride in accurate workmanship** and attention to detail in second-fix terminations and final fit-out phases; worked reliably from **technical drawings, plans, and instructions** to deliver quality-assured installations on schedule and within scope.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
