PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **project management and operational support** across enterprise health and financial services systems at HCL Technologies, coordinating cross-functional stakeholder engagement with banking domain business analysts, operations teams, and regulatory compliance officers to deliver UAT coordination and post-implementation triage on production systems serving 100+ concurrent users.
- Designed and maintained **data management workflows** and **digital reporting infrastructure** using **Power BI, Tableau, and Python ETL pipelines** to support operational dashboards, business intelligence reporting, and data-driven decision-making for senior stakeholders across banking and enterprise business systems domains.
- Executed comprehensive **document writing, editing, and proofing** for technical specifications, operational runbooks, user guides, and compliance reports across multiple audiences—regulatory bodies, internal teams, and external banking clients—ensuring clarity, accuracy, and adherence to audit and governance standards.
- Orchestrated **change-control management** and **system integration** workflows across interconnected enterprise systems including ERP modules, REST APIs, and multi-database environments (**PostgreSQL, Oracle, MySQL**), supporting seamless data flows and configuration updates in production health and financial services operations.
- Deployed **production monitoring, incident response, and SLA management** using **Splunk, CloudWatch, and Dynatrace**, achieving P1/P2 incident resolution within regulatory timeframes and maintaining operational visibility across payments-processing dashboards supporting SWIFT messaging and cross-border payment workflows.
- Automated **communication and administrative workflows** through **Python scripting, Jenkins CI/CD pipelines, and GitHub Actions orchestration**, reducing manual data processing by 40% and enabling rapid delivery of operational reports, data validation tasks, and scheduled ETL jobs for cross-functional teams.

SKILLS

Project Management & Operations – project planning and delivery, stakeholder engagement, operational support, UAT coordination, change-control management, Jira, Confluence.

Data Management & Digital Design – Power BI, Tableau, Python, pandas, NumPy, SQL, data modelling, ETL pipelines, data warehousing, Power Query.

Writing & Communications – technical documentation, operational runbooks, user guides, report writing, proofreading, compliance documentation, stakeholder reporting.

Enterprise Systems & Integration – ERP support, REST API integrations, multi-database management, system interconnectivity, PostgreSQL, Oracle, MySQL.

Production Support & Monitoring – Splunk, CloudWatch, Dynatrace, incident response, SLA management, application support, SWIFT messaging, payments processing.

Automation & Development – Python scripting, Jenkins, Git, GitHub Actions, Java Spring Boot, Linux, shell scripting, data pipeline automation.

Health & Financial Services Domain – SWIFT messaging (MT/MX), ISO 20022, SEPA, cross-border payments, payments operations, regulatory compliance, GDPR, audit trails, PSD2.

EDUCATION AND TRAINING

PROJECTS

National Care Experience Programme Data & Operations Support (HCL Technologies)

- Designed and deployed **Power BI operational dashboards** and **data management infrastructure** to track national service-user experience surveys across health services, enabling real-time visibility into survey progress, response rates, and data quality metrics for the National Care Experience Programme team and Department of Health stakeholders.
- Developed comprehensive **operational documentation, user guides, and training materials** to support data collection, management, and reporting processes across multiple health and social care service providers, ensuring consistent data quality and regulatory compliance for sensitive health information.
- Orchestrated **stakeholder engagement workshops** and **UAT coordination sessions** with HSE operations teams, Mental Health Commission, and external health service providers to gather requirements, validate data workflows, and ensure seamless integration with existing health service systems.
- Automated **data validation and ETL pipelines** using **Python and SQL** to ingest, clean, and reconcile survey responses from multiple health services, reducing manual data processing time by 45% and improving data accuracy for downstream analytics and compliance reporting.

Health Information Standards & Data Quality Assurance (HCL Technologies)

- Led **project management and communications coordination** across the Health Information and Standards Directorate, managing multiple concurrent operational workstreams, coordinating with internal teams and external health service stakeholders, and ensuring timely delivery of data management and digital initiative milestones.
- Implemented **data governance and document control processes** for health information standards, including writing and reviewing policy documentation, technical specifications, and procedural guides for a variety of audiences—from regulatory bodies to operational health service staff.
- Supported **change management and system integration** across health service platforms, coordinating UAT, managing production deployments, and tracking issues through structured change-control workflows to ensure minimal disruption to service delivery.
- Built **Tableau operational dashboards** and **automated reporting infrastructure** to monitor data quality metrics, project delivery status, and service performance indicators, enabling leadership to make informed decisions on health information and standards initiatives.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
