PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Administered and maintained **Microsoft 365, SharePoint Online, and Power Platform** environments across enterprise banking systems, configuring sites, libraries, permissions governance frameworks, and user access controls to ensure security best practices and minimal oversharing risk.
- Designed, configured, and deployed **SharePoint Online intranet sites, departmental collaboration spaces, and information architecture** with governance policies, permission audits, and lifecycle management for 500+ concurrent users across banking and ERP operational teams.
- Developed and deployed **Power Automate workflows** integrating **SharePoint, Microsoft Dynamics 365 Dataverse, and legacy systems** to automate payments reconciliation, change-management approvals, and cross-functional UAT coordination—reducing manual processing by **40%**.
- Administered **Microsoft Dynamics 365** architecture including entity configuration, Dataverse tables, security roles, environment provisioning, and system integrations with **REST APIs** and database-level data flows across PostgreSQL, Oracle, and MySQL production environments.
- Performed **SharePoint maintenance, audits, performance monitoring, and optimization** including backups, permission reviews, usage reporting, and continuous improvement—generating performance dashboards and driving adoption of emerging Microsoft technologies including **Copilot and Power BI**.
- Collaborated with business stakeholders, internal IT teams, and cross-functional departments to clarify requirements, deliver effective Microsoft solutions, and provide **user training, support, and guidance** on SharePoint, Power Automate, and Power Platform tools in compliance with GDPR and regulatory governance standards.

SKILLS

Microsoft Cloud & Administration – Microsoft 365, SharePoint Online, Microsoft Teams, OneDrive, Power Platform, Microsoft Dynamics 365, Dataverse, Power Automate, Power BI, Microsoft Purview, Azure.

SharePoint & Collaboration – SharePoint Online administration, site configuration, libraries, permissions management, information architecture, intranet design, governance frameworks, workflow automation, auditing.

Dynamics 365 & Integration – Microsoft Dynamics 365 architecture, entity configuration, Dataverse tables, security roles, environment management, REST API integration, system interconnections.

Cloud Engineering & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins, Git), cloud architecture, system administration, change-control management.

Data, Analytics & Reporting – Power BI dashboards, DAX measures, data modelling, performance reporting, usage analytics, Power Query, SQL (PostgreSQL, MySQL, Oracle).

Enterprise Systems & Compliance – ERP integration, change-management workflows, UAT coordination, GDPR compliance, access governance, security best practices, regulatory audit trails.

Development & Scripting – Python, Java Spring Boot, REST APIs, automation scripting, shell scripting, Linux administration, prompt engineering, API integration.

EDUCATION AND TRAINING

PROJECTS

SharePoint & Power Automate Integration for Banking Operations (HCL Technologies)

- Architected and deployed a **SharePoint Online intranet platform** with **Power Automate workflows** to automate SWIFT payments reconciliation, cross-border payment tracking, and operational approval chains for a tier-1 banking client.
- Configured **Microsoft Dynamics 365 Dataverse entities** to model payment message flows, transaction states, and regulatory audit trails; integrated with **REST APIs** to synchronize banking core systems and legacy ERP platforms in real-time.
- Implemented **permission governance audits, security roles, and access controls** across SharePoint, Teams, and Dynamics 365 to enforce GDPR compliance, minimize oversharing risk, and maintain segregation of duties for payments operations teams.
- Designed **Power BI performance dashboards** tracking SharePoint adoption, workflow execution metrics, and user engagement; generated monthly governance reports and drove continuous improvement across collaboration and automation platforms.

Microsoft 365 & Power Platform Rollout for Enterprise ERP (HCL Technologies)

- Led the **administration, configuration, and rollout** of **Microsoft 365, SharePoint Online, and Power Platform** technologies to support enterprise business-system users migrating from legacy collaboration tools to cloud-based intranet and workflow platforms.
- Configured **Microsoft Dynamics 365 and Dataverse** to integrate with existing **ERP modules and operational platforms**; established **security roles, environment governance, and change-control processes** for system configuration updates and post-go-live support.
- Delivered comprehensive **user training, support guides, and onboarding materials** for **Copilot, Power Automate, and Power BI**; provided hands-on support during UAT phases and post-implementation triage across finance, operations, and HR teams.
- Audited and optimized **SharePoint information architecture, permissions, and workflows**; tracked usage patterns, generated performance reports, and implemented governance best practices to ensure secure, scalable, and well-designed collaboration environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
